RE: Sunray Tontitown's Assessment Monitoring Program
CSN: 72-0144 Permit No.: 162-SR-2

Dear Mr. Hodges:

I am writing in regard to the analytical results that were reported for Monitoring Well 3 (MW-3). The results from the March 1996 and June 1996 sampling events show the presence of the following VOC's.

March 1996

Vinyl Chloride 8 ug/l MCL 2 ug/l
1,1-Dichloroethane 3 ug/l MCL n/a
cis-1,2-Dichloroethene 2 ug/l MCL 70 ug/l

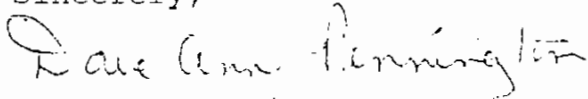

June 1996

Vinyl Chloride 6 ug/l MCL 2 ug/l

Vinyl chloride exceeds the Maximum Contaminate Level (MCL) in MW-3; therefore, MW-3 must be added to the assessment monitoring program and background samples should be collected to place the additional well in full assessment monitoring.

If you should have any questions concerning this correspondence, please do not hesitate to contact me at 682-0606.

Sincerely,

A handwritten signature in cursive script that reads "Dave Ann Pennington".

Dave Ann Pennington
Solid Waste Division Geologist
