Re: DAMCO project

Dear Mr. Lawrence:

On December 8, 2011, I met with Tim McKinney, Chairman of the Ozark Mountain Regional Solid Waste District regarding the completion of the dam sit project referred to in your letters mailed to each of us on November 15, 2011. Both Mr. McKinney and myself are committed to completing the dam project in a manner that is both expeditious and economical.

Mr. McKinney has requested that I obtain an engineer to reconfigure the slope on the dam structure. This will allow Don Yarbough with Tire Co. Inc., to set the bales so that the project can be completed as quickly as possible. I am currently in the process of acquiring an engineer. It is my intention to provide Mr. McKinney and ADEQ with the engineers' proposal as soon as it is prepared..

Once this is accomplished, Mr. McKinney and I will discuss the options available to finish the site. Any proposal, will of course, be subject to ADEQ approval.

If you require any further information, please contact me.

Sincerely,

  
Kenton Treat, President
