Re: **Third Quarter 2015 Explosive Gas Monitoring**
NABORS - Class I Landfill
AFIN: 03-0051 Permit No. 0249-S1-R2, 0249-S4

Dear Mr. Sadler:

Chimney Rock Consulting (CRC) is pleased to present you with the results of the Third Quarter 2015 Explosive Gas Monitoring at the NABORS – Class I Landfill (Landfill). The Third Quarter Explosive Gas Monitoring Event was conducted on September 19, 2015 and consisted of monitoring the site perimeter Explosive Gas Monitoring probes GP-1 through GP-13, GP-14R, GP-15, GP-16R, GP-17, and GP-18R. In addition to these perimeter probes, the landfill office and scale house were monitored for Explosive Gas. It should be noted that GP-5, located on the southern boundary of the property, had methane readings above 100% LEL during the Third Quarter 2015 event.

Three (3) interior gas probes (GP-14, GP-16, and GP-18) which are not point of compliance probes were monitored for information purposes. Probe readings indicated methane was above 100% LEL at GP-14, GP-16, and GP-18.

As previously stated GP-14, GP-16, and GP-18 are interior gas probes and not point of compliance probes. GP-14R and GP-16R which are located along the property boundary to the north-northwest of GP-14 and GP-16 and GP-18R which is located along the property boundary to the west of GP-18 reported low levels of methane during the Third Quarter 2015 event.

The next required Quarterly Explosive Gas monitoring event for the Landfill is scheduled for December 2015. Please contact us if we can be of further service or if you have any questions concerning this report.
