**Subject:** Fire at Eco Class 4

Good evening! I was informed of a fire at the Eco-Vista Class 4 working face which occurred this evening sometime around 5-6 pm. Site personnel reported the fire to be approximately 50x50, and they believe something in a waste load caused the fire. Site management is investigating the source. The fire was extinguished by site personnel, but the Fire Department did respond and were on site. I will send an update tomorrow as more information is available.

Thank you,

Jodi
