RE: Work Plan for Well Installations Eco-Vista, LLC, Class 4 Landfill
Permit No: 0290-S4-R2; AFIN: 72-00144
Document Number: 84043 Reference Document ID: 83983

Dear Mr. Conrad,

The Division of Environmental Quality Office of Land Resources (DEQ) has received the Work Plan Well Installations Eco-Vista, LLC, Class 4 Landfill (Document ID: 83983). After review DEQ conditionally approves the work plan with the following comments.

1. In situations where boreholes are placed beyond 10 feet into the bedrock, DEQ requests the use of a 20 foot screen in order to have some of the screened interval out of the bedrock, instead of completely in the bedrock. The boring log for MW-20 displays this placement, and other wells in this vicinity have used screens longer than 10 feet. This “straddling” is to capture primary flow pathways that may occur above the bedrock.
2. After further review, please shift proposed monitoring well 22 farther to the southwest corner and closer to MW-3N. Please see the map below for the preferred relocation of the well – highlighted by the green circle.

If you have any questions or need any additional information, please contact me at 501-607-7215 or travis.atwood@adeq.state.ar.us.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Travis Atwood'.
