Project Name: Mayflower, AR Pipeline Incident
LLI Group #: 1397668

**General Comments:**

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below. Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are included in this data set

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

**Analysis Specific Comments:**

SW-846 8270C SIM, GC/MS Semivolatiles

Batch #: 13169WAB026 (Sample number(s): 7095859-7095877)

The recovery(ies) for one or more surrogates were outside of the QC window for sample(s) 7095859, 7095860, 7095861, 7095875

Batch #: 13169WAD026 (Sample number(s): 7095878-7095880, 7095882-7095884 UNSPK: 7095878)

The recovery(ies) for one or more surrogates were outside of the QC window for sample(s) 7095884

Sample #s: 7095859, 7095860, 7095861, 7095875, 7095884

The recovery for the sample surrogate(s) is outside the QC acceptance limits as noted on the QC Summary. The client was contacted and the data reported.

SW-846 6010B, Metals

Batch #: 131681848005 (Sample number(s): 7095863-7095884 UNSPK: 7095878 BKG: 7095878)

The recovery(ies) for the following analyte(s) in the MS and/or MSD was outside the acceptance window: Calcium

The duplicate RPD for the following analyte(s) exceeded the acceptance window: Chromium, Lead, Nickel, Vanadium

Batch #: 131681848006 (Sample number(s): 7095859-7095862 UNSPK: 7095861 BKG: 7095861)

The duplicate RPD for the following analyte(s) exceeded the acceptance window: Barium, Nickel

Ms. Lyndi Mott
ARCADIS
2929 Briarpark Drive, Suite 300
Houston, TX 77042

Dear Ms. Mott:

I am writing to inform you of revised analytical reports that are being issued for the following:

**Project: Mayflower, AR Pipeline Incident**

**Group No.: 1396775,1397455,1399494,1397668,1397806,1398443,1398099**
**SDG No.: various**

The correction to the data affects the PAHs in water by SIM analysis only.

During an additional review of this data it was determined that the peaks used to quantify benzo(b)fluoranthene, benzo(k)fluoranthene and benzo(a)pyrene were assigned incorrectly on the GC/MS, instrument 11165. This error was made during the calibration of this GC/MS on June 20, 2013 and was discovered on June 27, 2013. Including matrix spike and matrix spike duplicates, 28 samples had reportable concentrations of at least one of these compounds. See Attachment I for the original and revised concentrations of these 3 compounds in those 28 samples. These compounds were not detected in the other samples analyzed during this timeframe except for QC spikes. The revision did not cause any QC that recovered within the quality control limits originally to now be outside of specification. The initial calibrations, all affected QC, and sample data were corrected. The revised analytical reports reflect this correction and are enclosed. Revised EDDs and data packages will also be re-submitted.

In addition, at the request of the client, in the instances where no sample results changed but quality control data was impacted, only the data packages will be revised and resent . See Attachment II for a list of those sample delivery groups

Our quality control department has initiated an investigation of this issue and will provide an investigation summary letter upon completion.

The revised analytical report reflects this correction and is enclosed.

You are a valued client and we apologize for any inconvenience that this incident may have caused. If you have any questions or require further assistance, please call me at 717-656-2300, Ext. 1892. We appreciate your business and look forward to continuing to serve your laboratory needs.

Sincerely,

Richard Karam
Manager

## General Sample Comments

All QC is compliant unless otherwise noted. Please refer to the Quality Control Summary for overall QC performance data and associated samples.

## Laboratory Sample Analysis Record

| CAT No. | Analysis Name | Method | Trial# | Batch# | Analysis Date and Time | Analyst | Dilution Factor |
|---|---|---|---|---|---|---|---|

# Quality Control Summary

Client Name: ExxonMobil Group Number: 1397668
Reported: 07/05/13 at 08:40 AM

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

**Date of Receipt:** 6/17/13

**Time of Receipt:** 1636

**Source Code:** 01

**Shipping Container Sealed:** (YES) NO

**Custody Seal Present * :** (YES) NO

* Custody seal was intact unless otherwise noted in the discrepancy section

**Package:** (Chilled) Not Chilled

| Temperature of Shipping Containers | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cooler # | Thermometer ID | Temperature (°C) | Temp Bottle (TB) or Surface Temp (ST) | Wet Ice (WI) or Dry Ice (DI) or Ice Packs (IP) | Ice Present? Y/N | Loose (L) Bagged Ice (B) or NA | Comments |
| 1 | DT121 | 3.0 | TB | WI | Y | B | |
| ~~2~~ | | | | | | | |
| ~~3~~ | | | | | | | |
| ~~4~~ | | | | | | | |
| ~~5~~ | | | | | | | |
| ~~6~~ | | | | | | | |

**Number of Trip Blanks received NOT listed on chain of custody:** 0

**Paperwork Discrepancy/Unpacking Problems:**

**Unpacker Signature/Emp#:** 2308 **Date/Time:** 6/17/13 1754

Issued by Dept. 6042 Management

# Explanation of Symbols and Abbreviations

*The following defines common symbols and abbreviations used in reporting technical data:*

| | | | |
|---|---|---|---|
| **RL** | Reporting Limit | **BMQL** | Below Minimum Quantitation Level |
| **N.D.** | none detected | **MPN** | Most Probable Number |
| **TNTC** | Too Numerous To Count | **CP Units** | cobalt-chloroplatinate units |
| **IU** | International Units | **NTU** | nephelometric turbidity units |
| **umhos/cm** | micromhos/cm | **ng** | nanogram(s) |
| **C** | degrees Celsius | **F** | degrees Fahrenheit |
| **meq** | milliequivalents | **lb.** | pound(s) |
| **g** | gram(s) | **kg** | kilogram(s) |
| **µg** | microgram(s) | **mg** | milligram(s) |
| **mL** | milliliter(s) | **L** | liter(s) |
| **m3** | cubic meter(s) | **µL** | microliter(s) |
| | | **pg/L** | picogram/liter |

**<** less than - The number following the sign is the limit of quantitation, the smallest amount of analyte which can be reliably determined using this specific test.

**>** greater than

**ppm** parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg), or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.

**ppb** parts per billion

**Dry weight basis** Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

*Data Qualifiers:*

**C –** result confirmed by reanalysis.

**J -** estimated value – The result is ≥ the Method Detection Limit (MDL) and < the Limit of Quantitation (LOQ).

*U.S. EPA CLP Data Qualifiers:*

| Organic Qualifiers | | Inorganic Qualifiers | |
|---|---|---|---|
| **A** | TIC is a possible aldol-condensation product | **B** | Value is <CRDL, but ≥IDL |
| **B** | Analyte was also detected in the blank | **E** | Estimated due to interference |
| **C** | Pesticide result confirmed by GC/MS | **M** | Duplicate injection precision not met |
| **D** | Compound quantitated on a diluted sample | **N** | Spike sample not within control limits |
| **E** | Concentration exceeds the calibration range of the instrument | **S** | Method of standard additions (MSA) used for calculation |
| **N** | Presumptive evidence of a compound (TICs only) | **U** | Compound was not detected |
| **P** | Concentration difference between primary and confirmation columns >25% | **W** | Post digestion spike out of control limits |
| **U** | Compound was not detected | ***** | Duplicate analysis not within control limits |
| **X,Y,Z** | Defined in case narrative | **+** | Correlation coefficient for MSA <0.995 |

**Analytical test results meet all requirements of NELAC unless otherwise noted under the individual analysis.**

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR part 136 Table II as “analyze immediately” are not performed within 15 minutes.
