Appendix J Toxic Unit Calculations

Notes:

1. FCV obtained from USEPA 2003.
2. The sample total toxic unit is the summation of all analyte-specific toxic unit values. A TU equal to 1 or less indicates that risk to benthic receptors is not likely. A TU above 1 indicates that more evaluation is necessary to evaluate potential risk to the benthic receptors.

-- = not available or not applicable

FCV = final chronic value

$\mu\text{g}/\text{g}_{\text{OC}}$ = micrograms per gram of organic carbon

$\mu\text{g}/\text{kg}$ = micrograms per kilogram

PAH = polycyclic aromatic hydrocarbon

TOC = total organic carbon

TU = toxic unit

USEPA = United States Environmental Protection Agency
