Appendix F - Analytical Data Tables
Daily Surface Water Sampling Data

Downstream Areas Data Assessment Report
ExxonMobil Environmental Services Company
Mayflower Pipeline Incident Response, Mayflower, Arkansas

Notes:

1. Sample counts presented in the summary do not include field duplicates
2. PAHs for WS-011(1.5-2.0)072513 and WS-011(5.0-5.5)072513 were not analyzed due to a labeling error; therefore, analytical data is unavailable.
3. Locations and analytes sampled since July 15, 2013, are based on the Surface Water Sampling and Analysis Plan approved by the ADEQ on July 12, 2013. Oil & Grease at all locations and the deeper depth intervals for WS-010, WS-011, WS-012, and WS-014 were added to the program on July 23, 2013, per ADEQ request.

Acronyms and Abbreviations:
Deg C = degrees Celsius
DRY = insufficient water at location, therefore no samples were collected.
ft = feet
mg/l = milligrams per liter
NA = not analyzed
NS = not sampled
NTU = Nephelometric Turbidity Units
PAHs = polycyclic aromatic hydrocarbons
SU = standard units
SIM = selective ion monitoring
TPH = total petroleum hydrocarbons
ug/l = micrograms per liter
uS/cm = microSiemens per centimeter
VOCs = volatile organic compounds
X = sample was collected from the specified location on the specified date.

Qualifier Definitions:
* = Dissolved oxygen concentrations greater 10 mg/L potentially indicate field instrument calibration error.
< = less than the limit of qauntitation
B = Analyte was also detected in the blank (organic); value is <CRDL, but >IDL (inorganics)
D = Compound quantitated on a diluted sample
J = The compound was positively identified; however, the associated numerical value is an estimated concentration only.
R = Sample result rejected.
U = Compound was not detected
UB = Compound considered non-detect at the listed value due to associated blank contamination.
UJ = The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.

Appendix F - Analytical Data Tables
Weekly Surface Water Sampling Data

Downstream Areas Data Assessment Report
ExxonMobil Environmental Services Company
Mayflower Pipeline Incident Response, Mayflower, Arkansas

Notes:

1. Sample counts presented in the summary do not include field duplicates
2. Locations and analytes sampled since November 4, 2013, are based on the Surface Water Sampling and Analysis Plan submitted to the ADEQ on November 1, 2013.
3. Limited surface water sampling during the week of February 3, 2014 due to icy and unsafe ground conditions.

Acronyms and Abbreviations:

Deg C = degrees Celsius
DRY = insufficient water at location, therefore no samples were collected.
ft = feet
mg/l = milligrams per liter
ND = non-detect
NTU = Nephelometric Turbidity Units
NV = not validated
SU = standard units
PAHs SIM = polycyclic aromatic hydrocarbons selective ion monitoring
ug/l = micrograms per liter
uS/cm = microSiemens per centimeter
X = sample(s) was collected from the specified location during the specified week.

Qualifier Definitions:

– = Not available or applicable
< = less than the limit of qauntitation
* = Dissolved oxygen concentrations greater 10 mg/L potentially indicate field instrument calibration error.
J = The compound was positively identified; however, the associated numerical value is an estimated concentration only.
U = Compound was not detected
UB = Compound considered non-detect at the listed value due to associated blank contamination.
UJ = The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.

Notes:

< = less than the limit of quantitation
B = Analyte was also detected in the blank (organic); value is <CRDL, but >IDL (inorganics)
Deg C = degrees Celsius
ft = feet
J = The compound was positively identified; however, the associated numerical value is an estimated concentration only.
mg/l = milligrams per liter
NTU = Nephelometric Turbidity Units
PAH = polycyclic aromatic hydrocarbons
SU = standard units
TPH = total petroleum hydrocarbons
U = Compound was not detected
UB = Compound considered non-detect at the listed value due to associated blank contamination.
ug/l = micrograms per liter
UJ = The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.
uS/cm = microSiemens per centimeter
VOC = volatile organic compound
