1.0 SUMMARY

FTN Associates, Ltd. (FTN) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of the American Society for Testing of Materials (ASTM) practice E 1527-13 of the J.T Parsons Cabinet Company Property at 420 West Ohlendorf Road in Osceola, Mississippi County, Arkansas (the Property). Any exceptions to, or deletions from, this practice are described in Sections 2.3.3 and 5.1 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the project property except for the following:

1. Arkansas Municipal Waste-to-Energy (AMWE), which operated at the project property, was listed in six of the environmental databases searched by EDR. This finding is a historical REC.
2. One of the surrounding sites, the E.R. Moore site, is located directly adjacent to the project property to the south. This property was also utilized by AMWE to store chemicals. Although the building that was formerly located on the E.R. Moore site has been demolished, contamination in the subsurface environment may remain from the historical storage of chemicals. Therefore, this finding is a REC.
3. During operations of AMWE at the project property, medical, radioactive, hazardous and non-hazardous wastes were illegally stored in the project property building. From 2003 to 2012, all of the wastes were removed under enforcement actions conducted by both ADEQ and EPA Region 6. This finding represents a historical REC.
4. A black, sludge-like material and red staining on the interior concrete floor of the building on the project property was noted during the FTN reconnaissance for this Phase I ESA. Due to the past storage of hazardous materials in this building, this finding is a REC.
5. Possible underground storage tank related piping was noted during the reconnaissance by FTN, indicating the potential presence of a tank. None of the research conducted by FTN for this Phase I ESA revealed any documentation about a tank; therefore this finding is a REC.
6. There are two 55-gallon drums currently in the project property building whose volume and contents are unknown. This finding represents a REC.
7. The J.T. Parsons Cabinet Company operations utilized a number of hazardous chemicals, including perchloroethylene, TCE, toluene, xyelene, acetone,

naphthalene, MEK, MIBK and ethlybenzene. These findings represent historical RECs.

2.0 INTRODUCTION

2.1 Property Location and Legal Description

The project property, which is 2.5 acres in size, is located at 420 West Ohlendorf Road in Osceola, Mississippi County, Arkansas. The legal description, as provided by the City of Osceola, is as follows:

Osceola Irreg Lots S150' N1220.2' E726.6' W756.6' W1/2 NE1/4

2.2 Purpose of a Phase I ESA

The purpose of a Phase I ESA is to evaluate a tract of commercial real estate with respect to petroleum products and hazardous substances defined by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLA, also commonly referred to as Superfund, is a federal law that requires reporting of hazardous substance releases, establishes the liability of persons responsible for hazardous substance releases, and establishes a trust fund to provide for the cleanup when no responsible party can be identified. The ESA is intended to assist the User with satisfying requirements to qualify, if needed, for limitations on CERCLA liability. These limitations can apply to a User who is a landowner, contiguous property owner, or prospective purchaser.

ASTM Standard Practice E 1527-13 is considered to meet the “all appropriate inquiries” (AAI) guidelines regarding the previous ownership and uses of the property. The specific goal of this process is to identify RECs on the property. A REC is defined in ASTM Standard Practice E 1527-13 as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.”

A REC can include listed CERCLA hazardous substances or petroleum products even under conditions that are in compliance with applicable laws and regulations. The definition of a CERCLA hazardous substance is outlined in Title 40 Code of Federal Regulations (CFR)

Part 302.4. Substances that are either specifically listed in 40 CFR Part 302.4 or meet the criteria of an unlisted substance are defined as a hazardous substance by federal rule.

According to ASTM Standard Practice E 1527-13, a historical recognized environmental condition—a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). ASTM Standard Practice E 1527-13 also defines *de minimis* conditions as those that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies (such as very small quantities of hazardous substances or petroleum products). *De minimis* conditions are not considered RECs.

2.3 Contractual Details of the Project

2.3.1 Scope of Services

FTN has performed a Phase I ESA in general accordance with ASTM Standard Practice E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Any deletions and/or additional services that deviate from this standard are described in Sections 2.3.3 and 2.3.4, respectively. This standard does not include investigation into all areas of local, state, and federal environmental requirements. These requirements were not addressed within this report, and FTN is not responsible for other legal obligations for noncompliance with regulations not addressed specifically herein.

2.3.2 Significant Assumptions

FTN's findings, opinions, and conclusions (Sections 7.1, 7.2, and 7.7, respectively) are based upon information provided by others and by site observations, and are subject to and limited by the terms and conditions of FTN's agreement with the Arkansas Department of Environmental Quality (ADEQ). Information provided to FTN by subcontractors or individuals

familiar with and/or associated with the project property or adjoining properties has been accepted in good faith and is assumed to be accurate. If additional information becomes available that may affect the following opinions and conclusions, FTN reserves the opportunity to review the information and modify this ESA report as warranted.

FTN, by virtue of providing the ESA, does not assume the responsibility of the person(s) in charge of the site, or otherwise undertake responsibility for reporting to any local, state, or federal public agencies any conditions at the site which may present a potential concern to public health, safety, or the environment. It is FTN understands that the person(s) in charge of the project property will notify appropriate regulatory agencies as required.

The nature of the site visit was limited in its ability to fully assess potential environmental liabilities associated with any commercial real estate transaction. Therefore, FTN cannot and will not accept any liability for environmental conditions that currently exist, formerly existed, or may exist at this site in the future. Sampling and analysis of air, water, soil, or unknown materials are beyond the scope of ASTM Standard Practice E 1527-13 and have not been performed by FTN for this assessment.

FTN has made appropriate inquiry and conducted a visual investigation in accordance with ASTM Standard Practice E 1527-13 to determine the existence of UST (underground storage tank) usage (past and present) on the property. FTN cannot entirely preclude the possibility that underground tanks and/or associated piping may be present and/or may have existed at the site without a subsurface investigation, which was not part of the scope of work for this assessment.

2.3.3 Limitations and Exceptions to the Standard Practice

There are no limitations or exceptions to the standard practice for this Phase I ESA.

2.3.4 Additional Services beyond the Scope of the Standard Practice

No additional services beyond the scope of ASTM Standard Practice E 1527-13 were requested as part of this Phase I ESA.

2.3.5 User Reliance

This report has been prepared for the exclusive use of ADEQ and the City of Osceola, Arkansas on this specific project. These services have been provided in accordance with generally accepted environmental practices. No other warranty, expressed or implied, is made. The contents of this report should not be construed in any way to indicate FTN's recommendation to purchase, sell, or develop the project property.

3.0 USER-PROVIDED INFORMATION

The information in this section can help identify the possibility of RECs on the property. The AAI Rule set forth at 40 CFR Part 312 requires that a User seeking to qualify for landowner liability protection under CERCLA provide the information in this section. These tasks must also be completed by, or on behalf of, recipients of US Environmental Protection Agency (EPA) Brownfield Assessment and Characterization grants. In accordance with ASTM Standard Practice E 1527-13, the User is responsible for providing the information in this section for the ESA.

3.1 Environmental Liens or Activity and Use Limitations

Environmental liens and activity and use limitations (AULs) are legally distinct instruments with different purposes. Both can commonly be found within recorded land title records; however, environmental liens and AULs that are imposed by judicial authorities may be recorded or filed in judicial records only. Chain-of-title reports will not normally disclose environmental liens or AULs.

The User did not provide recorded title records to FTN as part of this project.

3.2 Specialized Knowledge or Experience

No specialized knowledge or experience was communicated with FTN as a part of this Phase I ESA.

3.3 Actual Knowledge

The User did not provide to FTN any actual knowledge that would be useful in the assessment of potential RECs on the property.

3.4 Valuation Reduction for Environmental Issues

The User did not provide any information regarding property value with respect to environmental issues.

3.5 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information was reviewed for this Phase I ESA.

3.6 Degree of Obviousness

Information provided by the User is discussed in Section 3.2.

3.7 Reason for Performing Phase I ESA

This Phase I ESA is being performed to assist the User with satisfying requirements to qualify, if needed, for limitations on CERCLA liability. It is also assumed that the ESA is needed for the User to understand potential environmental conditions that could impact any future development on the property.

4.0 RECORDS REVIEW

4.1 Environmental Record Sources

The purpose of this section is to document record sources reviewed during the ESA. This section includes federal, state, and local environmental/regulatory agency inquiries, database and records research, and reviews. The objective is to identify environmental permits, incidents, complaints, violations, response actions, and remedial activities relating to owners, operators, and tenants on the project property, on adjoining properties, and on the remaining properties within specific minimum search distances.

Environmental Data Resources, Inc. (EDR) was contracted to perform a search of available records. The search was performed according to specific search criteria for state and federal databases as outlined in ASTM Standard Practice E 1527-13. The results of the environmental database review are shown in EDR Report No. 4026463.2s, dated August 4, 2014, which is included as Appendix E.

Government environmental database records searched in the EDR review are listed below.

4.1.1 Standard Federal Environmental Record Sources

The following standard federal databases are listed in Section 8.2.1 of ASTM Standard Practice E 1527-13:

1. National Priorities List (NPL);
2. Proposed NPL;
3. National Priority List Deletions (Delisted NPL);
4. Federal Superfund Liens (NPL Liens);
5. Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS);
6. CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP);
7. CERCLA Lien Information (LIENS 2);
8. Corrective Action Report (CORRACTS);

9. RCRA (Resource Conservation and Recovery Act) Transporters, Storage and Disposal (RCRA-TSDF);
10. RCRA Large Quantity Generators (RCRA-LQG)
11. RCRA Small Quantity Generators (RCRA-SQG);
12. RCRA – Conditionally Exempt Small Quantity Generators (RCRA-CESQG);
13. RCRA – Non Generators (RCRA-NonGen);
14. Engineering Controls Sites List (US ENG CONTROLS);
15. Sites with Institutional Controls (US INST CONTROL); and
16. Emergency Response Notification System (ERNS).

4.1.2 Supplemental Federal Environmental Record Sources

The following supplemental federal databases were searched:

1. Hazardous Materials Information Reporting System (HMIRS);
2. Incident and Accident Data (DOT OPS);
3. Clandestine Drug Labs (CDL);
4. List of Brownfields Sites (US BROWNFIELDS);
5. Department of Defense Sites (DOD);
6. Formerly Used Defense Sites (FUDS);
7. Land Use Control Information System (LUCIS);
8. Superfund (CERCLA) Consent Decrees (CONSENT);
9. Records of Decision (ROD);
10. Uranium Mill Tailings Sites (UMTRA);
11. Open Dump Inventory (ODI);
12. Mines Master Index File (MINES);
13. Toxic Chemical Release Inventory System (TRIS);
14. Toxic Substances Control Act (TSCA);
15. FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act)/TSCA (Toxic Substances Control Act) Tracking System (FTTS);
16. FIFRA/TSCA Tracking System (FTTS INSP);
17. FIFRA/TSCA Tracking System Administrative Case Listing (HIST FTTS);

18. FIFRA/TSCA Tracking System Inspection and Enforcement Case Listing (HIST FTTS INSP);
19. Section 7 Tracking Systems (SSTS);
20. Integrated Compliance Information System (ICIS);
21. PCB Activity Database System (PADS);
22. Material Licensing Tracking System (MLTS);
23. Radiation Information Database (RADS);
24. Facility Index System/Facility Identification Initiative Program Summary Report (FINDS);
25. RCRA Administrative Action Tracking System (RAATS); and
26. Biennial Reporting System (BRS).

4.1.3 Standard State and Tribal Environmental Record Sources

The following standard state and tribal databases are listed in Section 8.2.1 of ASTM Standard Practice E 1527-13:

1. Hazardous Substance Remedial Action Trust Fund Priority List (SHWS);
2. Solid Waste Facility Permit Database (SWF/LF);
3. Solid Waste Illegal Dumps Database (SWID);
4. Recycling Directory (SWRCY);
5. Leaking Underground Storage Tank Data (LTANKS);
6. Underground Storage Tank Data (UST);
7. Aboveground Tank Database (AST);
8. Emergency Response Incidents (SPILLS);
9. Institutional Control/Land Use Restriction Sites (INST CONTROL);
10. Voluntary Cleanup Program Sites (VCP);
11. Brownfields Projects (BROWNFIELDS);
12. Leaking Underground Storage Tanks on Indian Land (INDIAN LUST); and
13. Underground Storage Tanks on Indian Land (INDIAN UST).

4.1.4 Supplemental State and Tribal Environmental Record Sources

The following supplemental state and tribal databases were searched:

1. Consent Administrative Order, Notice of Violation Information Database (ENFORCEMENT);
2. Poultry Sludge Permit Sites (AR Sludge);
3. Permit Data System (PERMITS);
4. Permitted Facility Emission and Stack Data (AIRS);
5. Asbestos Notification of Intent Database (ASBESTOS);
6. Indian Reservations (INDIAN RESERV); and
7. Report on the Status of Open Dumps on Indian Lands (INDIAN ODI).

4.1.5 Additional Federal, State, Tribal, and/or Local Environmental Record Sources

Additional environmental record sources used for this assessment included the following:

- EDR Proprietary Historical Databases, Former Manufactured Gas Sites;
- Public Water System Data (PWS); and
- United States Geological Survey (USGS) Water Wells.

4.1.6 Search Results

The J.T. Parsons Cabinet Company property was not listed in the EDR environmental records. However, the Arkansas Municipal Waste-to-Energy Warehouse (AMWE) Site was listed in six of the environmental data bases (AMWE operated at the project property after the J.T. Parsons Cabinet Company had closed its business). Seven surrounding properties within the ASTM radius search were listed in the EDR environmental records search. FTN's opinions on the significance of these findings are addressed in Section 7.0.

Tables 4.1 and 4.2 list the results of the EDR database search for the project property and the surrounding properties.

Table 4.1. Findings from federal and state environmental databases for Arkansas Municipal Waste-to-Energy (formerly operated at project property)

Code	Source	Comments
AR SHWS	ADEQ	Hazardous Substance Remedial Action Trust Fund Priority List.
AR ENF	ADEQ	Enforcement actions by the ADEQ.
AR PERMITS	ADEQ	Facility had an air permit and a hazardous waste permit.
CERCLIS	EPA	Facility was screened and assessed for potential placement on the EPA National Priorities List.
RCRA NonGen/NLR	EPA	Facility does not currently generate hazardous waste.
PRP	EPA	A listing of verified Potentially Responsible Parties.

Table 4.2. Findings from federal and state environmental databases for surrounding properties.

Code	Source	Comments
AR SHWS AR ASBESTOS	ADEQ	Arkansas Waste to Energy E.R. Moore Site, 1025 Ohlendorf Road. Site is on the Hazardous Substance Remedial Action Trust Fund list. Facility is located within 1/8 mile to the southwest at a relatively lower elevation. Demolition-related asbestos activities have occurred at this property.
AR UST AR PERMITS	ADEQ	Phillips Construction Co. Phillips Drive & Industrial Road. Facility is an underground storage tank site located within 1/8 mile to the south-southeast at a relatively higher elevation. Facility has a regulated storage tank permit.
AR SWRCY AR UST AR PERMITS AR Financial Assurance	ADEQ	Osceola Waste Materials, Inc., 1125 Industrial Drive. Facility is a recycler, an underground storage tank site, and has a regulated storage tank permit. Financial assurance ensures that closure, post-closure care and corrective measures are paid should the owner/operator be unable or unwilling to pay. Facility is located within 1/4 mile to the south-southeast at a relatively higher elevation.
AR UST AR PERMITS	ADEQ	Shell Oil Company, Kriser & Walnut. Facility is an underground storage tank site and has a regulated storage tank permit. Located within 1/4 mile to the north-northeast at a relatively higher elevation.

Table 4.2. Findings from federal and state environmental databases for surrounding properties (continued).

Code	Source	Comments
AR AST	ADEQ	Razorback Concrete Co #102, 1175 Industrial Rd. Facility is an above ground storage tank site located within ¼ mile to the south-southeast at a relatively higher elevation.
CERLIS	EPA	Osceola Incinerator, 100 Incinerator Road. Facility was screened and assessed for potential placement on the EPA National Priorities List. Located within ½ mile to the south-southeast at a relatively higher elevation.
AR SHWS AR SWF/LF AR PERMITS AR Financial Assurance	ADEQ	Osceola Transfer Station, 100 Incinerator Road. Site is on the Hazardous Substance Remedial Action Trust Fund list. Site is in the Solid Waste facility permit database. Facility has or had a hazardous waste permit. Financial assurance ensures that closure, post-closure care and corrective measures are paid should the owner/operator be unable or unwilling to pay. Located within ½ mile to the south-southeast at a relatively higher elevation.

Twelve unmapped sites were identified in the EDR report. None of these sites appear to adjoin the project property.

4.2 Regulatory Agency Files and Records

FTN reviewed files that were available for the project property at the Arkansas Department of Environmental Quality, Records Section. The ADEQ file review indicated the following items in the history of the project property's regulatory history:

- The J.T. Parsons Cabinet Company was issued an air permit by ADEQ in 1990.
- In 1991, the J.T. Parsons Cabinet Company filed an Annual VOC Emissions Report with ADEQ for chemicals used in the facility finishing department.
- Also in 1991, the J.T. Parsons Cabinet Company received invoices for varying amounts of the following materials:
 - Paint
 - Re-conditioned perchloroethylene
 - Toluene
 - Acetone

- In 1992, an annual product inventory report submitted to ADEQ included the following materials:
 - Lacquer
 - Paint
 - Sealer
 - Stain
 - Xylene
 - Toluene
 - Acetone
 - Re-conditioned perchloroethylene
 - Trichloroethylene (TCE)
- The facility submitted this same list in 1994, 1995 and 1996 with the exception of TCE.
- In 1998, the facility product inventory did not list re-conditioned perchloroethylene or TCE.
- An invoice from 1996 indicates that the facility also used naphthalene in its process.
- MSDS Sheets in the ADEQ air file indicate that the facility may have used methylethyl ketone (MEK), methyl isobutyl ketone and ethyl benzene.
- The air permit issued to J.T. Parsons Cabinet Company by ADEQ was for 72.8 tons of VOC usage per year.
- Facility production of sewing machine cabinets dropped by large quantities between the years 1996 and 1997.
- An internal ADEQ memorandum indicated that, in 1989, the J.T. Parsons Cabinet Company shipped 20,957 pounds (lbs) of F003 wastes and 946 lbs of F001 waste to a nearby municipal incinerator. The memorandum recommends that ADEQ initiate an enforcement action at the project property.
- The J.T. Parsons Cabinet Company air permit was voided by ADEQ in 2000.
- In 2003, a citizen complaint was submitted to ADEQ regarding the storage of flammable materials in the J.T. Parsons Cabinet Company building. A subsequent investigation by ADEQ confirmed that Arkansas Municipal Waste-to-Energy (AMWE) was illegally storing containers of both hazardous and non-hazardous materials in the building. Approximately 20,000 containers of waste were noted during the ADEQ investigation. Container leaks and spills were also noted by ADEQ. AMWE had been leasing a nearby incinerator from the City of Osceola

for the burning of those materials since 2002. AMWE was owned by Mr. Wally Elbeck.

- AMWE and Wally Elbeck abandoned the J.T. Parsons property in 2003.
- In 2004, a structural assessment of the J.T. Parsons Cabinet Company building was conducted by ECCI.
- From 2004 to 2012, all of the containers of waste in the J.T. Parsons Cabinet Company were removed by various Potentially Responsible Parties (PRPs), under the enforcement actions of both ADEQ and EPA Region 6. The removal action also included eight drums of radioactive waste.
- Post removal, the interior of the building was also swept and cleaned by EPA Region 6.
- Post removal, EPA Region 6 conducted a sampling and analysis investigation of soils surrounding the J.T. Parsons Cabinet Company building.
- The Arkansas Department of Health (ADH) determined that the results of the soil sampling by EPA Region 6 did not indicate a health hazard for the future trespasser scenario.
- The keys to the building on the project property were given to the City of Osceola.

4.3 Physical Setting Sources

USGS topographic quadrangle Osceola, AR-TN (7.5-minute series) was reviewed during the preparation of this report. This map was published/revised by USGS in 1983. According to the contour lines on the topographic map, the site is at an elevation of approximately 244 ft National Geodetic Vertical Datum of 1929 (NGVD 29). The ground surface contour lines in the area indicate that local topography slopes to the south-southeast. Based upon local topography, the direction of groundwater flow in the vicinity of the project property is estimated to flow toward the south-southeast; however, without performing a hydrogeologic evaluation, the depth and direction of groundwater flow cannot be determined.

The EDR report indicated the presence of thirteen wells in the US Geological Survey (USGS) database located within a one mile radius of the project property. These wells generally range from 1,400 to 1,500 feet in depth and are completed within the Wilcox Group of the Mississippi Embayment Aquifer System. Two of the USGS wells are completed in the

Mississippi River Alluvial Aquifer at depths of 47 and 23 feet below ground surface (bgs), respectively.

The EDR report indicates that a well is located at the Jr. Food Mart at 604 West Kaiser Street in Osceola. No other information about the well is provided, except that the water is untreated. The Osceola Waterworks operates wells within one mile to the north of the project property, but the EDR report does not provide further information regarding address or depth.

4.4 Historical Use Information on the Property

Historical use information from topographic maps, Sanborn Fire Insurance maps and aerial photographs were reviewed for historical use information about the project property. A summary of the review is outlined below.

4.4.1 Topographic Maps

Historic topographic maps of the project property were obtained from EDR. Maps dated 1948, 1963, 1972 and 1983 were reviewed. The maps are included in Appendix D. The results of the map review are presented in Table 4.3.

Table 4.3. Summary of historic use information for project property obtained from topographic maps.

Year	Historical Usage
1948	Project property is undeveloped.
1963	A road appears to have been built around the project property.
1972	Project property is developed with two structures.
1983	Project property is developed with three structures and resembles current conditions.

4.4.2 Aerial Photographs

Aerial photographs of the project property were obtained from the Arkansas Highway and Transportation Department (AHTD). Photographs dated 1973, 1979, 1984 and 1994 were reviewed. The aerial photographs are included in Appendix D. The results of the review are presented in Table 4.4.

Table 4.4. Summary of historic use information for project property obtained from aerial photographs.

Year	Historical Usage
1973	Project property is developed commercially and active.
1979	Project property is developed commercially and active.
1984	Project property is developed commercially and active.
1994	Project property is developed commercially and active.

4.4.3 City Directories

Historical city street directories are not readily available for the City of Osceola.

4.4.4 Chain of Title

Based upon the Scope of Work for this project, FTN was not contracted to provide a chain of title for this project. Under the requirements of ASTM Standard Practice E 1527-13, it is the User's responsibility to provide a title search.

4.4.5 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were not available for the project property, documentation of which is located in Appendix D.

4.4.6 Additional Historical Sources

Historical ownership for the project property was researched by FTN at the Mississippi County Courthouse. The results of the ownership research are presented in the following table.

Table 4.5. History of ownership for the project property.

Date	Owner
4/6/2009	Set Group, LLC
3/9/2009	Medley, Shawn T.
9/6/2001	Set Group, LLC
8/6/2001	Set Group, LLC
8/3/1998	Vantassel, Delma

A copy of the Mississippi County records is located in Appendix D.

4.5 Historical Use Information on Adjoining Properties

Historical topographic maps, aerial photographs and Sanborn Fire Insurance Maps were reviewed to obtain historical use information on adjoining properties.

4.5.1 Topographic Maps

FTN personnel reviewed historic topographic maps of the surrounding area obtained from EDR. Maps dated 1948, 1963, 1972 and 1983 were reviewed. The maps are included in Appendix D. The results of the map review are presented in Table 4.6.

Table 4.6. Summary of historic use information for adjoining properties obtained from topographic maps.

Year	Historical Usage
1948	North: residence and warehouse. South: residence and open land. East: Railroad tracks and open land. West: residence and open land.
1963	North: warehouses. South: large building and open land. East: small commercial building. West: residences and open land.
1972	North: warehouses and water tower. South: large building and warehouses. East: open land. West: open land.
1983	North: warehouses and water tower. South: large building and warehouses. East: commercial buildings. West: open land.

4.5.2 Aerial Photographs

Aerial photographs of the area surrounding the project property were obtained from AHTD. Photographs dated 1973, 1979, 1984 and 1994 were reviewed. The aerial photographs are included in Appendix D. The results of the review are presented in Table 4.7.

Table 4.7. Summary of historic use information for adjoining properties obtained from aerial photographs.

Year	Historical Usage
1973	North: warehouses and water tower. South: large commercial building with some smaller commercial buildings; large white above ground storage tank. East: auto salvage yard. West: open land. Note: AST in this photograph appears to be connected to the project property.
1979	Materially unchanged since 1973.
1984	Materially unchanged since 1973.
1994	Materially unchanged since 1973.

4.5.3 City Directories

Historical city street directories are not readily available for the City of Osceola.

4.5.4 Chain of Title

Based upon the Scope of Work for this project, FTN was not contracted to provide a chain of title for this project. Under the requirements of ASTM Standard Practice E 1527-13, it is the User's responsibility to provide a title search.

4.5.5 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were reviewed for historical usage of adjoining properties. The Sanborn Map coverage only provided information for the adjoining property to the north. On a 1964 Sanborn Map, the warehouses to the north of the project property were labeled "Cotton Warehouse No. 9" and "Federal Compress & Ware House Co". A water tower is located at the southwest corner of the Federal Compress Company building. The Federal Compress Company building is also visible on a 1939 Sanborn Map. Copies of the Sanborn Maps are located in Appendix D.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Ms. Jean Koeninger of FTN Associates, Ltd. (FTN) conducted the site reconnaissance on August 8, 2014. Ms. Koeninger was accompanied by Mr. Ed Allred, Director of Public Works for the City of Osceola for part of the site reconnaissance. Ms. Koeninger walked the entire project property and property boundaries to record observations. The northern edge of the project property is covered with dense vegetation, which presented a limiting condition.

5.2 General Site Setting/Characteristics

5.2.1 Current Use of the Property

The project property is occupied by the now-vacant J.T. Parsons Cabinet Company facility.

5.2.2 Past Use of the Property

Research performed as part of this Phase I ESA indicates that the project property has been most recently used to improperly store medical, radioactive, hazardous and non-hazardous waste by Arkansas Municipal Waste-to-Energy (AMWE). The wastes were stored at the project property as they awaited incineration at a nearby facility. Prior to that, the project property housed the J.T. Parsons Cabinet Company which manufactured wood cabinets for sewing machines.

5.2.3 Current Uses of Adjoining Properties

The following is a description of the uses of adjoining properties:

- North: warehouses and water tower.
- South: Parsons Road thence open field and large concrete slab.
- East: Osceola Iron & Metal and salvage yard.
- West: Ohlendorf Road and soybean fields.

5.2.4 Past Use of Adjoining Properties

Research conducted as part of this Phase I ESA indicates that adjoining properties have been developed as they currently are since at least 1973.

5.2.5 Current or Past Uses in the Surrounding Area

Research conducted as part of this Phase I ESA indicates that the surrounding area has been industrially developed with an emphasis on agricultural products since at least 1939.

5.2.6 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Mississippi County, Arkansas is located within the Mississippi Embayment Physiographic Region of eastern Arkansas. The predominant surface geology in this area is comprised of alluvial deposits of the Mississippi River (U.S. Geological Survey). The topography of the Osceola area is relatively flat.

The EDR report indicated the presence of thirteen wells in the US Geological Survey (USGS) database located within a one mile radius of the project property. These wells generally range from 1,400 to 1,500 feet in depth and are completed within the Wilcox Group of the Mississippi Embayment Aquifer System. Two of the USGS wells are completed in the Mississippi River Alluvial Aquifer at depths of 47 and 23 feet below ground surface (bgs), respectively.

The EDR report indicates that a well is located at the Jr. Food Mart at 604 West Kaiser Street in Osceola. No other information about the well is provided, except that the water is untreated. The Osceola Waterworks operates wells within one mile to the north of the project property, but the EDR report does not provide further information regarding address or depth.

5.2.7 Description of Structures, Roads, and Other Improvements

The project property is improved with a steel frame building on an elevated concrete slab. The building has seen several additions since its original construction. Walls are constructed of cinder block and the flat roof is a combination of metal and wood. A cinder block structure is also located on the eastern side of the project property. The total enclosed space is approximately

61,352 square feet, according to Mississippi County records. Two large hoppers or cyclones are located on the project property that appear to have been used for dust control during the cabinet manufacturing process. Access to the project property is gained via Parsons Drive. Asphalt and gravel parking is located on the south side of the building.

5.3 Exterior Observations

5.3.1 Pits/Ponds/Lagoons

No pits, ponds or lagoons were noted during the FTN site reconnaissance.

5.3.2 Stained Soil

No stained soil was noted during the FTN site reconnaissance.

5.3.3 Solid Waste

Large quantities of metal and wood debris are present throughout the building. Also, remnant equipment from the wood cabinet manufacturing process is also present.

5.3.4 Wastewater/Stormwater

The project property was formerly served by a municipal sewer system. Earthen drainage ditches are also located to the east of the project property. Given the topography in the area of the project property, it is expected that surface water would flow to the south.

5.3.5 Wells

During the site reconnaissance by FTN, no evidence of wells was noted.

5.3.6 Septic Systems

No evidence of a septic system was noted during the FTN site reconnaissance.

5.4 Interior Observations

5.4.1 Heating/Cooling

Air conditioning units are located on the roof of the building. Gas furnace units are located throughout the building as well.

5.4.2 Stains/Corrosion

A black, sludge-like material is present on the concrete floor throughout the building. There is an area of red staining on the concrete floor located within the building as well.

5.4.3 Drains/Sumps

No evidence of drains or sumps was noted during the site reconnaissance by FTN.

5.5 Other Observations

5.5.1 Storage Tanks

Possible underground storage tank-related piping is located in the west-central interior portion of the building, indicating the potential presence of a UST.

5.5.2 Odors

No unusual odors were noted during the FTN site reconnaissance.

5.5.3 Pools of Liquid

There is standing water within the building on the project property but this appears to be the result of rain leaking in through the damaged roofing system.

5.5.4 Drums

There are three 55-gallon drums in the building on the project property. One of the drums is open, and is full of water and what appear to be metal molds or cut-outs. The other drums are closed, and are of unknown content and volume.

5.5.5 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection With Identified Uses)

In addition to the three 55-gallon drums described in Section 5.5.4, a 5-gallon gasoline can was noted inside the building during the site reconnaissance.

5.5.6 Unidentified Substance Containers

No unidentified substance containers were noted during the FTN site reconnaissance.

5.5.7 Polychlorinated Biphenyls

One pole-mounted electrical transformer (PMT) is located on the southeast corner of the project property. No evidence of leaking or staining was noted during the site reconnaissance.

6.0 INTERVIEWS

6.1 Interview with Owner

According to the City of Osceola, the current owner of the project property is not available for interview and the business that last operated at the project property (Arkansas Municipal Waste-to-Energy) is no longer in existence.

6.2 Interview with Site Manager

The project property is vacant and there is no site manager.

6.3 Interviews with Occupants

The project property is vacant and there are no site occupants.

6.4 Interviews with Local Government Officials

FTN interviewed Mr. Ed Allred, Director of Public Works with the City of Osceola during the site reconnaissance. Mr. Allred stated that the project property was formerly served by city water and sanitary sewer systems. Mr. Allred also stated that there are no wells on the project property. Mr. Allred estimated that the cabinet manufacturing operation at the project property has been out of business for at least 20 years. Mr. Allred stated that EPA and ADEQ have both conducted cleanup activities at the project property after it was used for the improper storage of hazardous, industrial and medical wastes.

6.5 Interviews with Others

FTN completed a Site Visit Questionnaire which is located in Appendix E.

7.0 EVALUATION

7.1 Findings

FTN performed a Phase I ESA on the J.T. Parsons Cabinet Company property located at 420 West Ohlendorf Road in Osceola, Mississippi County, Arkansas. FTN was contracted to perform the ESA by the Arkansas Department of Environmental Quality on behalf of the City of Osceola.

No findings were identified with the project property during the completion of this Phase I ESA, with the exception of the following:

1. The J.T. Parsons Cabinet Company property was not listed in the EDR environmental records. However, the Arkansas Municipal Waste-to- Energy Warehouse (AMWE) Site was listed in six of the environmental data bases AMWE operated at the project property after the J.T. Parsons Cabinet Company had closed its business.
2. Seven surrounding properties within the ASTM radius search were listed in the EDR environmental records search.
3. Twelve unmapped sites were identified in the EDR report.
4. Research performed as part of this Phase I ESA indicates that the project property has been most recently used to improperly store medical, radioactive, hazardous and non-hazardous waste by a former operator of Arkansas Municipal Waste-to-Energy (AMWE). The wastes were stored at the project property as they awaited incineration at a nearby facility. From 2003 to 2012, industrial, hazardous and medical wastes were removed from the project property through the cooperative efforts of the ADEQ, EPA Region 6 and various potentially responsible parties (PRPs).
5. Prior to operations of AMWE, the project property housed the J.T. Parsons Cabinet Company which manufactured wood cabinets for sewing machines. The project property appears to have been first developed around 1972. The cabinet business ceased operations at least 20 years ago.
6. Large quantities of metal and wood debris are present throughout the building. Also, remnant equipment from the wood cabinet manufacturing process is also present.
7. A black, sludge-like material is present on the concrete floor throughout the building. There is an area of red staining on the concrete floor located within the building as well.

8. Possible underground storage tank-related piping is located in the west-central interior portion of the building, indicating the potential presence of a UST.
9. There are three 55-gallon drums in the building on the project property. One of the drums is open, and is full of water and what appear to be metal molds or cut-outs. The other drums are closed, and are of unknown content and volume.
10. A 5-gallon gasoline can was noted inside the building during the site reconnaissance.
11. There is one pole-mounted electrical transformer (PMT) located on the southern side of the project property. No evidence of leaking or staining was noted during the site reconnaissance.
12. A summary of the FTN review of available ADEQ regulatory files indicates the following:
 - The project property had an air permit for VOC emissions from 1990 to approximately 2000.
 - The J.T. Parsons Cabinet Company operations utilized a number of hazardous chemicals, including perchloroethylene, TCE, toluene, xyelene, acetone, naphthalene, MEK, MIBK and ethlybenzene.
 - A citizen complaint in 2003 ultimately led to several removal actions relating to hazardous materials which were illegally stored in the J.T. Parsons Cabinet Company building by Arkansas Municipal Waste-to-Energy (AMWE). The removal actions, which were performed under enforcement actions by both ADEQ and EPA Region 6, were completed in 2012. During one ADEQ inspection, prior to removal, approximately 20,000 containers of wastes were noted, some of which were leaking; spills were also noted.
 - The Arkansas Department of Health determined that the post-removal soil sampling by EPA indicated that there was no health risk posed to the future trespasser scenario.

FTN's opinions regarding the significance of these findings are outlined in Section 7.2.

7.2 Opinions

Opinions regarding the potential impact on the project property from findings listed in Section 7.1 are listed below.

1. The J.T. Parsons Company property was not listed in the EDR environmental records searched for this Phase I ESA. This finding is not a REC.
2. Arkansas Municipal Waste-to-Energy (AMWE), which operated at the project property, was listed in six of the environmental databases searched by EDR. This finding is a historical REC.
3. Seven surrounding properties within the ASTM radius search were listed in the EDR environmental records search. One of these sites, the E.R. Moore site, is located directly adjacent to the project property to the south. This property was also utilized by AMWE to store chemicals. Although the building that was formerly located on the E.R. Moore site has been demolished, contamination in the subsurface environment may remain from the historical storage of chemicals. Therefore, this finding is a REC.
4. Twelve unmapped properties were identified in the EDR report. However, none of these properties appear to adjoin the project property and are not RECs.
5. During operations of AMWE at the project property, medical, radioactive, hazardous and non-hazardous wastes were illegally stored in the project property building. From 2003 to 2012, all of the wastes were removed under enforcement actions conducted by both ADEQ and EPA Region 6. This finding represents a historical REC.
6. A black, sludge-like material and red staining on the interior concrete floor of the building on the project property was noted during the FTN reconnaissance for this Phase I ESA. Due to the past storage of hazardous materials in this building, this finding is a REC.
7. Possible underground storage tank related piping was noted during the reconnaissance by FTN, indicating the potential presence of a tank. None of the research conducted by FTN for this Phase I ESA revealed any documentation about a tank; therefore this finding is a REC.
8. There are two 55-gallon drums currently in the project property building whose volume and contents are unknown. This finding represents a REC.
9. A 5-gallon gasoline can in the project property building is a *de minimis* amount and does not represent a REC.
10. No leakage related to the PMTs on the project property was noted by FTN; therefore, this finding does not represent a REC.

11. The J.T. Parsons Cabinet Company operations utilized a number of hazardous chemicals, including perchloroethylene, TCE, toluene, xyelene, acetone, naphthalene, MEK, MIBK and ethlybenzene. These findings represent historical RECs.

7.3 Additional Investigations

No additional investigations were undertaken as part of this Phase I ESA.

7.4 Data Gaps

No data gaps were encountered during this Phase I ESA.

7.5 Additional Services

Additional services beyond the scope of ASTM Standard Practice E 1527-13 are discussed in Section 2.3.4, if applicable.

7.6 Limiting Conditions/Deviations

Limiting conditions, deletions, and/or deviations from ASTM Standard Practice E 1527-13 are discussed in Section 2.3.3, if applicable.

7.7 Conclusions

FTN Associates, Ltd. (FTN) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of the American Society for Testing of Materials (ASTM) practice E 1527-13 of the J.T. Parsons Cabinet Company property located at 420 West Ohlendorf Road in Osceola, Mississippi⁸ County, Arkansas (the Property). Any exceptions to, or deletions from, this practice are described in Sections 2.3.3 and 5.1 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property except for the following:

1. Arkansas Municipal Waste-to-Energy (AMWE), which operated at the project property, was listed in six of the environmental databases searched by EDR. This finding is a historical REC.

2. One of the surrounding sites, the E.R. Moore site, is located directly adjacent to the project property to the south. This property was also utilized by AMWE to store chemicals. Although the building that was formerly located on the E.R. Moore site has been demolished, contamination in the subsurface environment may remain from the historical storage of chemicals. Therefore, this finding is a REC.
3. During operations of AMWE at the project property, medical, radioactive, hazardous and non-hazardous wastes were illegally stored in the project property building. From 2003 to 2012, all of the wastes were removed under enforcement actions conducted by both ADEQ and EPA Region 6. This finding represents a historical REC.
4. A black, sludge-like material and red staining on the interior concrete floor of the building on the project property was noted during the FTN reconnaissance for this Phase I ESA. Due to the past storage of hazardous materials in this building, this finding is a REC.
5. Possible underground storage tank related piping was noted during the reconnaissance by FTN, indicating the potential presence of a tank. None of the research conducted by FTN for this Phase I ESA revealed any documentation about a tank; therefore this finding is a REC.
6. There are two 55-gallon drums currently in the project property building whose volume and contents are unknown. This finding represents a REC.
7. The J.T. Parsons Cabinet Company operations utilized a number of hazardous chemicals, including perchloroethylene, TCE, toluene, xyelene, acetone, naphthalene, MEK, MIBK and ethlybenzene. These findings represent historical RECs.

7.8 Signatures

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of Title 40 Code of Federal Regulations, Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ARKANSAS WASTE-TO-ENERGY OSCEOLA INCINERATOR</i>	<i>420 WEST PARSONS DRIVE 100 INCINERATOR ROAD</i>	<i>E 0 - 1/8 (0.026 mi.) SSE 1/4 - 1/2 (0.315 mi.)</i>	<i>A2 B8</i>	<i>12 55</i>

State- and tribal - equivalent NPL

AR SHWS: Hazardous Substance Remedial Action Trust Fund Priority List.

A review of the AR SHWS list, as provided by EDR, and dated 06/16/2014 has revealed that there are 3 AR SHWS sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

SHELL OIL COMPANY	KRISER & WALNUT	NNE 1/8 - 1/4 (0.242 mi.)	6	47

AR AST: Aboveground Tank Database

A review of the AR AST list, as provided by EDR, and dated 06/23/2014 has revealed that there is 1 AR AST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
RAZORBACK CONCRETE CO #102	1175 INDUSTRIAL RD	SSE 1/8 - 1/4 (0.244 mi.)	7	53

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

AR SWRCY: Registered Directory of the Department of Environmental Quality.

A review of the AR SWRCY list, as provided by EDR, and dated 05/12/2014 has revealed that there is 1 AR SWRCY site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OSCEOLA WASTE MATERIALS INC.	1125 INDUSTRIAL DRIVE	SSE 1/8 - 1/4 (0.183 mi.)	5	29

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that

EXECUTIVE SUMMARY

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

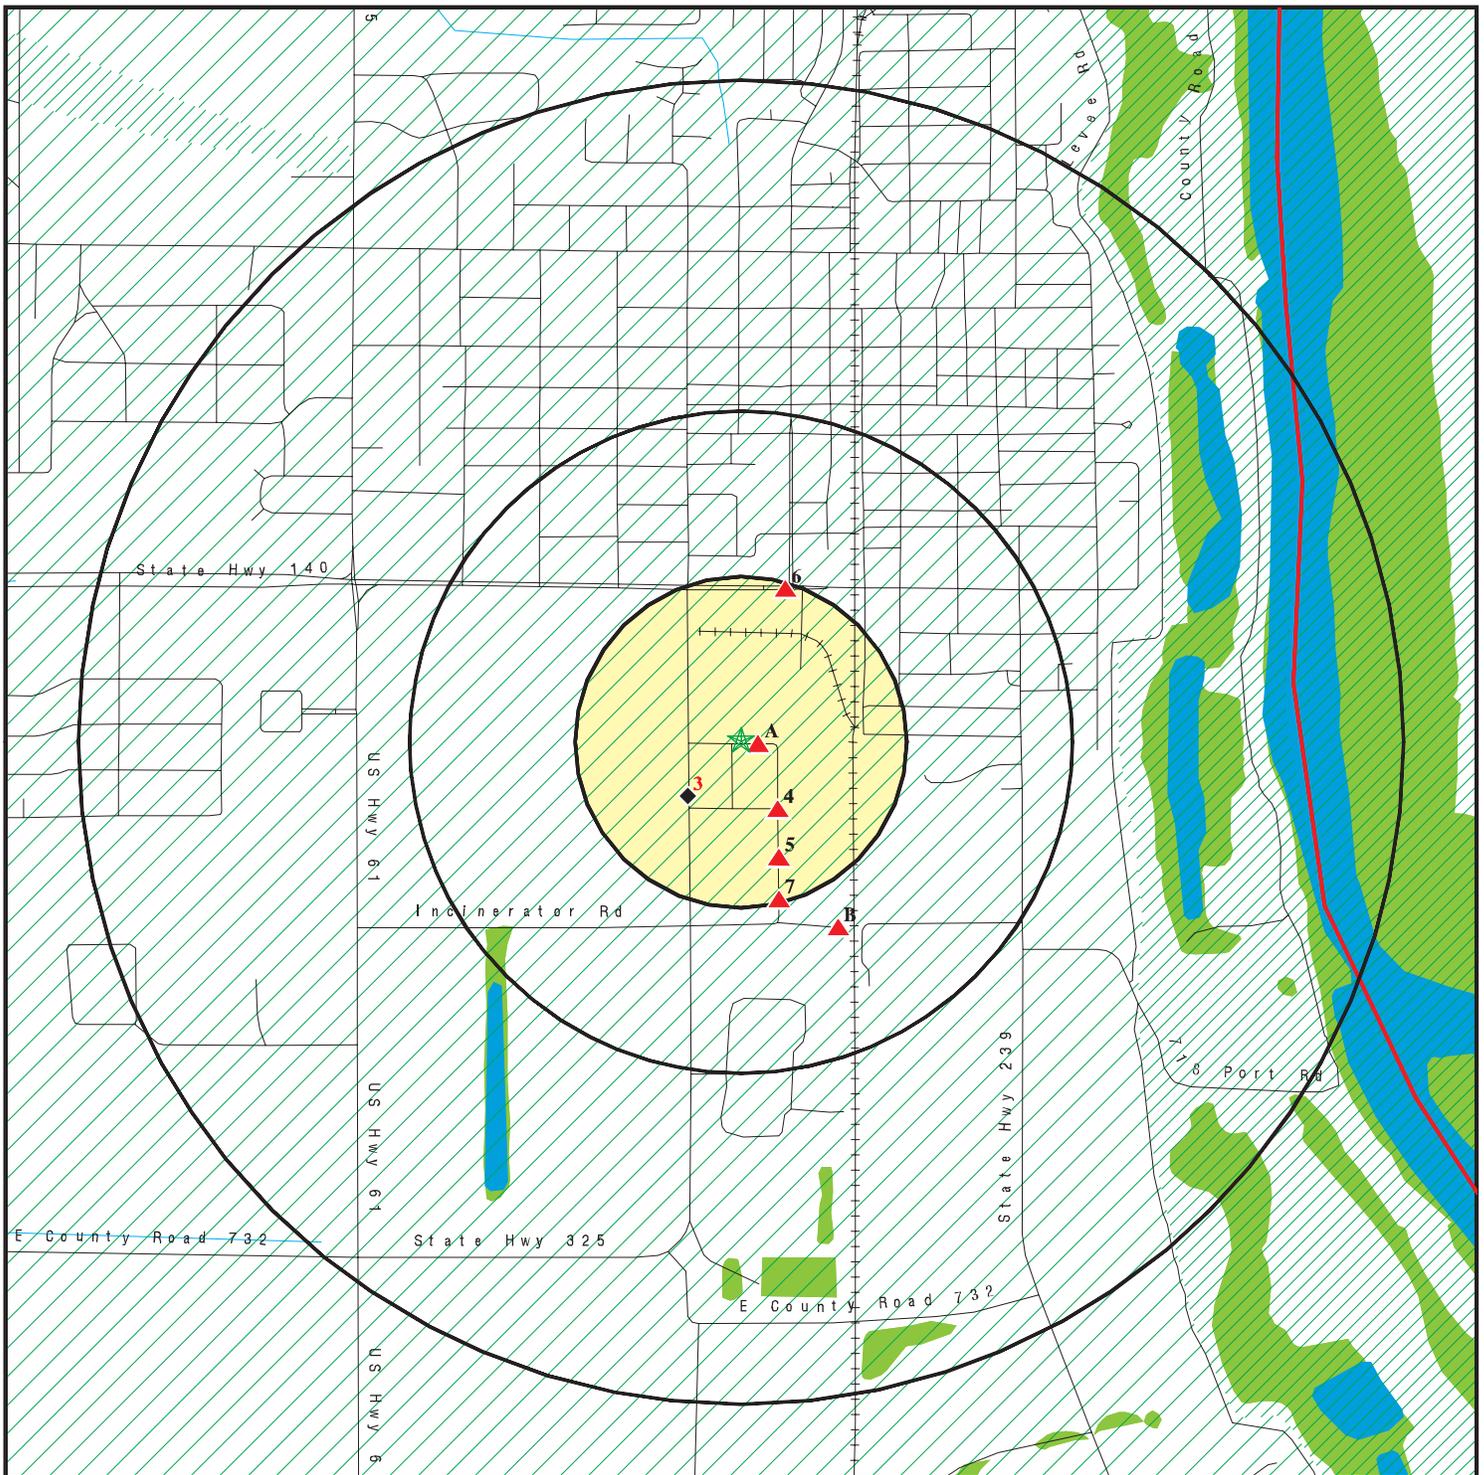

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ARKANSAS WASTE-TO-ENERGY</i>	<i>420 WEST PARSONS DRIVE</i>	<i>E 0 - 1/8 (0.026 mi.)</i>	<i>A2</i>	<i>12</i>

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 12 records.

Site Description: The site is owned by the City of Osceola. Arkansas Municipal Waste -to-energy leased and operated the site. AMWE accepted and incinerated medical waste and non-hazardous industrial waste from other sources in addition to municipal waste. Approximately 20,000 drums and assorted containers of medical and hazardous waste was removed from the site by the city. No post-removal sampling has been performed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

TN SHWS: Promulgated Sites

"Inactive hazardous substance sites that constitute an imminent, substantial danger" is an inactive hazardous substance site where there is a threat of danger to the public health, safety, or environment which is both real and presently existing. Such situations may include, but are not limited to one or more of the following: an immediate action is necessary to minimize an ongoing threat to the public health or pollution of the environment, an inactive hazardous substance site where there is an active release, where direct access to the hazardous substance is not controlled, or where incompatible hazardous substances are found in close proximity. Also known as Promulgated Sites List.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands, Swamps, or Marshes

Source: Center for Advanced Spatial Technologies, University of Arkansas

Telephone: 605-594-6933

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	35089-F8 OSCEOLA, AR TN
Most Recent Revision:	1983

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

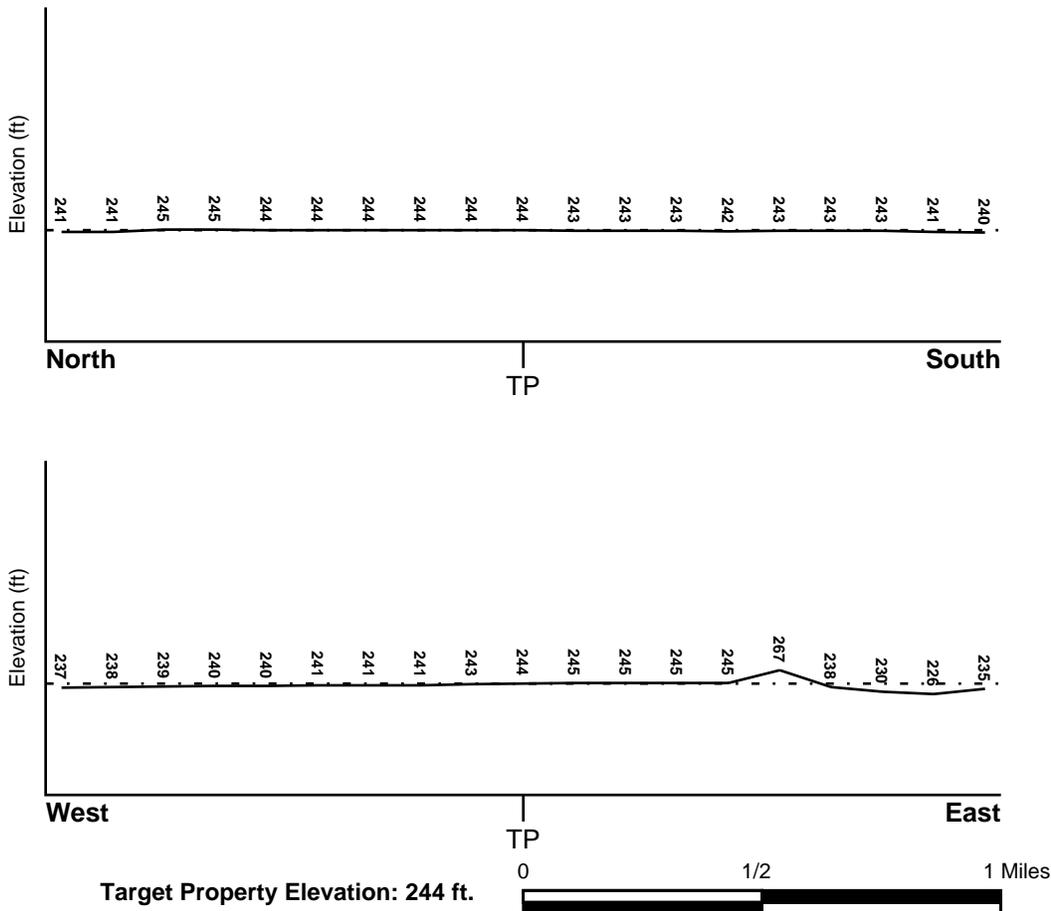

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> MISSISSIPPI, AR	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	05093C - FEMA DFIRM Flood data
Additional Panels in search area:	47097C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> OSCEOLA	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Commerce

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 5.6
2	5 inches	22 inches	silty clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1
3	22 inches	72 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Convent

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	very fine sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 5.6
2	11 inches	72 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands, Swamps, or Marshes

Source: Center for Advanced Spatial Technologies, University of Arkansas

Telephone: 605-594-6933

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by FTN Associates, Ltd. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

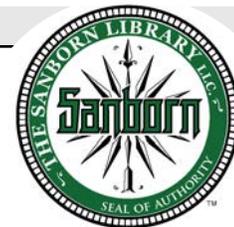

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EDR Inquiry # 4026463.3

Contact: Jean Koeninger

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by FTN Associates, Ltd. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Site Visit Questionnaire

Description of Site:

J.T. Parsons Cabinet Company
 420 West Ohlendorf Road, Osceola, AR

Question		Answer			Notes
1a.	Is the property used for an industrial use?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	
1b.	Is any adjoining property used for an industrial use?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
2a.	Did you observe evidence or do you have any prior knowledge that the property has been used for an industrial use in the past?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
2b.	Did you observe evidence or do you have any prior knowledge that any adjoining property has been used for an industrial use in the past?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
3a.	Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	
3b.	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	Osceola Iron and Metal adjoins the property to the east.
4a.	Did you observe evidence or do you have any prior knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	

Question	Answer	Notes
4b. Did you observe evidence or do you have any prior knowledge that the adjoining property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown	Osceola Iron & Metal to the east.
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unknown	Drums of unknown content on site.
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown	Drums of unknown content on site. Removal actions by EPA and ADEQ have occurred.
6a. Are there currently any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown	
6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown	
7a. Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	
7b. Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is of an unknown origin?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	
8a. Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	

Question		Answer		Notes
8b.	Did you observe evidence or do you have any prior knowledge that there have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	
9a.	Is there currently any stained soil on the property?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
9b.	Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	
10a.	Are there currently any registered or unregistered storage tanks (above or underground) located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	Possible UST in building.
10b.	Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	Possible UST in building.
11a.	Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Unknown	
11b.	Did you observe evidence or do you have prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Unknown	
12a.	Is there currently evidence of leaks, spills, or staining by substance other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Unknown	
12b.	Did you observe evidence or have any prior knowledge that there have been previously any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring drains, walls, ceilings or exposed ground on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
13a.	If the property is served by a private well or non public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	

Question		Answer		Notes
13b.	If the property is served by a private well or non public water system, is there evidence or do you have prior knowledge that the well have been designated as contaminated by any government environmental/health agency?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	
14.	Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
15a.	Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
15b.	Has the owner or occupant of the property been informed of the current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
15c.	Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
15d.	Has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
16.	Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
17.	Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substances or petroleum products involving the property or recommended further assessment of the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> Unknown	
18a.	Does the property discharge waste water (not including sanitary waste or stormwater) onto or adjacent to the property and/or into a stormwater system?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Unknown	

	Question	Answer	Notes
18b.	Does the property discharge waste water (not including sanitary waste or stormwater) onto or adjacent to the property and/or into a sanitary sewer system?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unknown	
19.	Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	
20.	Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unknown	

Government Records/Historical Sources Inquiry

Question	Approximate Minimum Search Distance miles (kilometers)	Answer
Do any of the following federal government record systems list the <i>property</i> or any <i>property</i> within the search distance noted below?		
Federal NPL site list	1.0 (1.6)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown

Federal RCRA CORRACTS facilities list	1.0 (1.6)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
Federal RCRA non-CORRACTS TSD facilities list	0.5 (0.8)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
Federal RCRA generators list	property and adjoining properties	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
Federal ERNS list	property only	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown

Question	Approximate Minimum Search Distance miles (kilometers)	Answer
Do any of the following state record systems list the <i>property</i> or any <i>property</i> within the search distance noted below?		
State-Equivalent NPL	1.0 (1.6)	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown
State-Equivalent CERCLIS	0.5 (0.8)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
State landfill and/or solid waste disposal site lists	0.5 (0.8)	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown
State leaking UST lists	0.5 (0.8)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
State registered UST lists	property and adjoining properties	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
Question		
23.	Based upon a review of <i>fire insurance maps</i> or consultation with the local fire department serving the <i>property</i> , all as specified in the guide, are any buildings or other improvements on the <i>property</i> or on an <i>adjoining property</i> identified as having been used for an industrial use or uses likely to lead to contamination of the <i>property</i> ?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown
Answer		

The preparer of the questionnaire must complete and sign the following page.

This questionnaire was completed by:

Name Jean Koeninger
Title Project Manager
Firm FTN Associates, Ltd.
Address 3 Innwood Circle, Suite 220
Little Rock, Arkansas 72211
Phone Number 501-225-7779
Date 8/13/2014
Preparer's relationship to site Consultant for ADEQ
Preparer's relationship to User Consultant
(e.g., principal, employee, agent, consultant)

User's relationship to the site (ex., owner, prospective purchaser, lender, etc.): State Environmental Agency

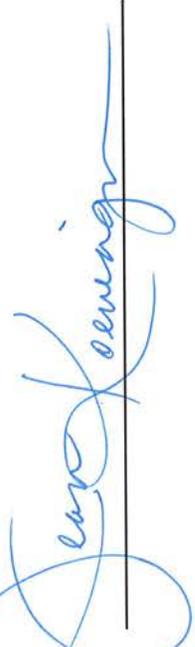

If the preparer(s) is different from the User, complete the following:

Name of User: _____
User's address: _____

Phone Number: _____

Copies of the complete questionnaire have been filed at: _____

Preparer represents that to the best of the preparer's knowledge the above statements and facts are true and correct and to the best of the preparer's actual knowledge no material facts have been suppressed or mis-stated.

Signature:  _____

Date: 8/13/2014

**Special Contractual Conditions Between the User and Environmental
Professional**

July 22, 2014
terry@adeq.state.ar.us

Mr. Terry Sligh
Brownfields Program Coordinator
Hazardous Waste Division
Arkansas Department of Environmental Quality
5301 Northshore Drive
Little Rock, AR 72118-5317

RE: Phase I Environmental Site Assessment
J.T. Parsons Cabinet Company, Osceola, Mississippi County, Arkansas
State Contract #4600017034
FTN No. P03013-0010-076

Dear Mr. Sligh:

This letter is in response to a request from the Arkansas Department of Environmental Quality (ADEQ) for a scope of work and cost estimate to perform a Phase I Environmental Site Assessment (ESA) according to the American Society of Testing and Materials (ASTM) Standard Practice E 1527-13 at the J.T. Parsons Cabinet Company property located at 443 Parsons Drive in Osceola, Mississippi County, Arkansas (project site).

PROJECT TASKS

Specific project tasks follow.

TASK 1 — PHASE I ENVIRONMENTAL SITE ASSESSMENT

The Phase I ESA will be prepared utilizing American Society for Testing of Materials (ASTM) Standard Practice E-1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This standard can satisfy the “innocent landowner defense” requirements under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ASTM Standard Practice E 1527-13 is also considered by the Environmental Protection Agency to satisfy the “all appropriate inquiry” rule regarding the assessment of the previous ownership and uses of the property.

Mr. Terry Sligh
July 22, 2014
Page 2

Following the completion of the Phase I ESA, recommendations will be provided to ADEQ regarding the need, if any, for Phase II ESA activities. Recommendations will be provided in a cover letter separate from the Phase I ESA report.

TASK 2 — COORDINATION

1. FTN will coordinate the work with the City of Osceola, subcontractors and ADEQ.
2. A progress report will be submitted with our invoice. The invoice will be provided at the beginning of the month following project completion.

PROJECT SCHEDULE

The Phase I ESA report will be completed within 4 weeks of our receipt of authorization to begin work by ADEQ.

PROJECT BUDGETS

The budget for Phase I ESA is \$4,889, which includes \$4,200 in labor; \$300 in expenses; and a fee of \$389.

We look forward to working with you again. If you have any questions about the proposed scope of work and budget, please do not hesitate to contact me at (501) 225-7779 or Jane Spellman, PG, at (479) 571-3334.

Respectfully submitted,
FTN ASSOCIATES, LTD.

Jean Koeninger, PG
Project Manager
