Re: Phase I Environmental Site Assessment Marion Gymnasium

54 E Military Road Marion, AR 72114

Harbor Project No. ADEQ-22488

Dear Ms. Smith:

Harbor has completed a Phase I Environmental Site Assessment on the above referenced property. Attached is an electronic copy of the final report with revisions as requested by the United States Environmental Protection Agency Region 6. **Harbor documented zero recognized environmental conditions for the subject property**. Please see the report for additional information.

Thank you for the opportunity to work on this project. Should you have any questions or require additional information, please do not hesitate to contact us at 501.663.8800.

Sincerely,

Caleb Gourley Project Manager

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Marion Gymnasium

54 E Military Road Marion, Crittenden County, Arkansas

Harbor Project No. ADEQ-22488

November 2022

Prepared for:

DIVISION OF ENVIRONMENTAL QUALITY OFFICE OF LAND RESOURCES

We declare that, to the best of our professional knowledge and belief, we meet the definition of *environmental professional* as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the *subject property*. We have developed and performed all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Harbor

EXECUTIVE SUMMARY

Harbor performed a Phase I Environmental Site Assessment (ESA) on the Marion Gymnasium building and property (subject property) located at 54 East Military Road in Marion, Crittenden County, Arkansas. The project was performed in conformance with the scope and limitations of the ASTM International Practice E 1527 - 21, "Environmental Site Assessments: Phase I Environmental Site Assessment," hereinafter referred to as the Standard. Any exceptions to, or deletions from, the Standard are discussed in Section 9.0 (Deviations) of this report. This report will serve to summarize the work performed by Harbor professionals as part of the project.

The subject property consists of one tract totaling 0.86 acres currently owned by the Marion School District. The subject property contains one 17,272-square foot, single-story, slab-on-grade structure reportedly constructed in 1938. The building is currently vacant but was previously in use as a gymnasium for the school district. Remaining exterior areas of the subject property are paved or lightly vegetated.

During the course of this project, Harbor performed a site reconnaissance, reviewed federal, state, and local environmental records, and interviewed persons familiar with the property to ascertain the current and historical use of the property and surrounding areas. **This Phase I ESA revealed zero recognized environmental conditions (RECs) relative to the subject property:**

Harbor assumes that the information provided by the persons interviewed for this project is correct. The site investigation is limited to those visually observable environmental conditions present on the property at the time of the inspection. Harbor did not have access to the adjoining properties. These sites were only visually inspected from the subject property. This report, and all work performed in conjunction with this report, are for exclusive use of Arkansas Department of Energy & Environment, Division of Environmental Quality (DEQ), the City of Marion, the Sultana Historical Preservation Society, Inc., and their agents or assigns. Other entities or individuals may only rely on this report with the express written consent of DEQ, the City of Marion, the Sultana Historical Preservation Society, Inc., and Harbor.

1.0 Introduction

1.1 Purpose of the Phase I Environmental Site Assessment

Harbor was authorized by Ms. Addie Smith of DEQ to perform a Phase I ESA on the Marion Gymnasium building and property (subject property) located at 54 E. Military Road in Marion, Crittenden County, Arkansas. The purpose of this Phase I ESA was to identify existing or potential RECs and/or historical RECs (as defined by ASTM Practice E 1527-21) in connection with the subject property.

A REC is defined in the Standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." According to the Standard, this term includes hazardous substances or petroleum products even under conditions in compliance with laws. It is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not considered to be RECs.

2.0 Detailed Scope of Service

The Standard identifies four (4) requisite components of any Phase I ESA. These items are a site reconnaissance, a records review, interviews with knowledgeable persons, and evaluation and report preparation. Accordingly, the scope of work for the subject project consisted of the following:

2.1 Site Reconnaissance

Harbor personnel visited the subject property on October 10, 2022, to visually and physically observe the subject property and all accessible structures located on the subject property. The environmental professional noted information about the general condition and site setting of the subject property. The objective of the site visit was to obtain information to identify potential RECs associated with the subject property.

2.2 Records Review

A review of reasonably ascertainable federal and state records was performed to help identify RECs in connection with the property. Harbor obtained federal and state records from Environmental Data Resources, LLC (EDR) of Shelton, Connecticut. The standard environmental record sources reviewed for this project included:

- National Priorities List;
- CERCLIS List;
- CERCLIS NFRAP Site List;
- RCRA CORRACTS List;
- RCRA Treatment, Storage, and Disposal Facilities;
- RCRA Generators List;
- Federal institutional control/engineering control registries;
- Federal Emergency Response Notification System List (ERNS) List;
- State and tribal lists of hazardous waste sites identified for investigation or remediation;
- State Remedial Action Site List:
- State and Tribal Landfill List;
- State and Tribal Voluntary Cleanup Sites;
- State and Tribal Brownfields Sites; and
- State and Tribal Registered and Leaking Storage Tank Lists.

Where available, the following supplemental records were also reviewed:

- Local Brownfields Lists;
- Local Lists of Landfills and SWDS;
- Registered Storage Tanks;
- Local Land Records;
- Records of Emergency Release Reports; and
- Records of Contaminated Wells.
- EDR Historic Auto Database
- EDR Historic Dry-Cleaner Database

Harbor also reviewed the current United States Geological Survey (USGS) 7.5-minute topographic map for the subject property (West Memphis, AR quadrangle, 2020). These maps are a standard source for information regarding the physical setting of the subject property. Historical land use information was obtained by reviewing available standard historical sources, which included historic topographic maps and aerial photographs, Sanborn Fire Insurance Maps (when available), city directories, and/or abstracts.

2.3 Interviews

In order to obtain information about current and historical use of the subject property and to attempt to identify any RECs, Harbor interviewed the following people/agencies:

Table 2-1 – Interviews Table

Description	Name and Contact Information Duration of Occupan		
Current Owner	City of Marion 2020 to present		
Owner/Occupant Representative	Addie Smith, DEQ Sultana Historical Preservation Society, Inc.		
Current Occupants	Vacant		
Historical Owner/Occupants	Rising Sun Church Unknown to 1938 Marion School District 1938-2020		
Local Fire Department	Fire Inspector Freddie Thorne City of Marion Fire Department <u>Fthorne501@yahoo.com</u> (email)		
Local Health Dept.	Mr. Ryan Christenson, Assistant Environmental Manager, Central Region, Arkansas Department of Health, Ryan.Christensen@Arkansas.gov		
Local Code Enforcement Agency	Ed Cain City of Marion Planning Commission (870) 739-2703 (Fax)		

The information obtained during the interviews with the aforementioned persons is summarized in Section 7.0 (Interviews) of this report.

2.4 Evaluation and Report Preparation

The Phase I ESA Report for this project was prepared by an environmental professional and reviewed for technical quality by a senior environmental professional. The report includes all documentation to support the analysis, opinions, and conclusions found herein. The documentation is of sufficient detail to reconstruct all research at a later date, if necessary, as required by the Standard.

2.5 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM International Standard Practice E 1527-21 and United States Environmental Protection Agency (EPA) requirements to ensure that the

methodologies used constitute appropriate inquiry into the prior uses of the property consistent with good commercial and customary practice in order to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with a property. Performance in accord with these standards is intended to reduce, but not eliminate, uncertainty with respect to the potential for RECs associated with a property. This report is designed to satisfy the requirements for the "innocent landowner," "contiguous property owner," and/or "bona fide prospective purchaser" limitations on liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 as defined in 42 USC 9601 B. Harbor assumes that the information provided by the persons interviewed for this project is correct.

2.6 Limitations and Exceptions

The information presented and conclusions made in this report are based upon the site inspection and records review performed by Harbor. The assessment is limited to visually observable environmental conditions present on the property at the time of the site inspection. Abundant large piles of debris and building materials on the site prevented the visual survey from including anything under the debris. Specific assessments of the following potential environmental conditions are <u>excluded</u> from this project: potential radon gas hazards, lead in drinking water, regulatory compliance, industrial hygiene, health and safety, indoor air quality, biological agents, and mold.

2.7 User Reliance

This assessment was performed at the request of Ms. Addie Smith of DEQ, utilizing methods and procedures consistent with good commercial or customary practices designed to conform to acceptable industry standards based on the conditions that existed and the information and data available to Harbor during this project. Factual information regarding operations, conditions, and test data provided by the client, owner, and/or their representative, is assumed to be correct and complete. The report may be distributed and relied upon by the client. The independent conclusions represent the best professional judgment of the individuals involved in this project. The document has been prepared for DEQ, the City of Marion, the Sultana Historical Preservation Society, Inc., and their successors or assigns. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by Harbor.

3.0 Site Description

3.1 Location and Legal Description

The subject property consists of one 0.22-acre parcel located in Section 24, Township 7 North, Range 8 East in Marion. A legal description of the property was obtained from Crittenden County online records:

SEC-TWP-RNG: 24-07-08 LOT/BLOCK: 1-4/6 SUBDIVISION: MARION ADDN.

The general location of the subject property is shown on Figure 3-1. It is an excerpt from the USGS 7.5-minute topographic maps of the area, West Memphis, AR quadrangle (2020). The map shows that topography at the subject property is approximately 222 feet above mean sea level (amsl).

The general layout of the subject property and surrounding area is shown on Figure 3-2 (Aerial Photograph). The figure was obtained from the ARCountyData.com website (https://www.arcountydata.com/maps/).

Figure 3-2 -Aerial Photograph

Source: ARCountyData.com Map (Subject property outlined in red)

3.2 Site and Vicinity General Characteristics

The subject property is located north of Military Road approximately 0.12-mile west of the intersection of Hwy 77 and Military Road in Marion, Arkansas. The subject property and

surrounding areas are in a mixed-use residential, commercial, and light industrial area. The Mississippi River is located approximately 7.0 miles east of the subject property.

3.3 Current Use of the Subject Property

The subject property consists of one 0.86-acre parcel currently owned by the Marion School District. The subject property is a nearly rectangular-shaped parcel that contains a 17,272-square foot structure reportedly constructed in 1938. The building is currently vacant but was previously in use as a school gymnasium. Remaining exterior areas of the subject property are paved or lightly vegetated.

3.4 Descriptions of Structures, Roads, Other Improvements on the Site

The building on the subject property is a single-story, slab-on-grade structure consisting of concrete block, brick veneer with a flat built-up roof. An asphalt paved drive with limited parking area is located on the north side of the building. Access to the subject property is via egress points along Briarwood St. to the west and Currie Ave. to the east. Site photographs are presented in Appendix A.

3.5 Site Utilities

Electricity on the subject property is provided by Entergy Arkansas. Power lines parallel the southern and western boundaries of the subject property along E. Military Road and Briarwood Street. Natural gas is provided by Summit Energy. Water and sewer services are provided by Marion Water Department. Several City of Marion solid waste disposal can were observed on the subject property.

3.6 Current Use of the Adjoining Properties

Military Road borders the southern portion of the subject property with Briarwood Street and Currie Avenue bordering the subject property on the west and east sides, respectively. To the west of Briarwood St. there are residential properties. To the east of Currie Ave, there are residential properties and U.S. Safety and Compliance Team which is a trucking safety company.

4.0 User Provided Information

4.1 Title Records

No title records were provided for review as part of this Phase I ESA. Review of available Crittenden County online tax records indicate that the subject property consists of one parcel currently owned by the Marion School District. Previous ownership records were not provided.

4.2 Environmental Liens or Activity and Use Limitations

During the interview for the Phase I ESA, Mr. Frank Fogleman, Mayor of the City of Marion, did not indicate knowledge of any environmental liens or activity use limitations associated with the subject property. No liens or activity and use limitations were identified in the database report for this project.

4.3 Specialized Knowledge

The client did not provide Harbor with any specialized knowledge that is material to RECs in connection with the properties. DEQ provided Harbor with a copy of a Hazardous Materials Survey conducted on the property. See section 5.3.4 for more information.

4.4 Commonly Known or Reasonably Ascertainable Information

Harbor was not provided with any commonly known or reasonably ascertainable information about the subject property that is material to RECs in connection with the subject property.

4.5 Valuation Reduction for Environmental Issues

Mr. Fogleman did not indicate that any valuation reduction for environmental issues have occurred.

4.6 Owner and Occupant Information

As previously referenced, the subject property is vacant and currently owned by the Marion School District.

4.7 Reason for Performing Phase I ESA

ESAs are generally requested to qualify a potential or current landowner for liability protection under CERCLA. These protections include the following:

Bona Fide Prospective Purchaser Liability Protection: A person may qualify as a bona fide prospective purchaser if, among other requirements, such person made "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices." Knowledge of contamination resulting from all appropriate inquiry would not generally preclude this liability protection. A person must make all appropriate inquiry on or before the date of purchase. The facility must have been purchased after January 11, 2002 to qualify.

Contiguous Property Owner Liability Protection: A person may qualify for the contiguous property owner liability protection if, among other requirements, such a person owns real property that is contiguous to, and that is or may be contaminated, by hazardous substances from other real property that is not owned by that person. Furthermore, such person must have conducted all appropriate inquiry at the time of acquisition of the property and did not know or have reason to know that the property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiry must not result in knowledge of contamination. If it does, then such person did "know" or "had reason to know" of contamination and would therefore not be eligible for the contiguous property owner liability protection.

Innocent Land Owner Defense: A person may qualify as one of three (3) types of innocent landowners: (i) a person who "did not know and had no reason to know" that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who "acquired the facility by inheritance or bequest." To qualify for the first type of innocent landowner liability protection, such person must have made all appropriate inquiry on or before the date of purchase. Furthermore, the all appropriate inquiry must have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the innocent landowner defense.

This Phase I ESA Report was prepared by Harbor at the request of DEQ. The purpose of the Phase I ESA was to identify any RECs associated with the subject property prior to purchase.

5.0 Records Review

In accordance with the Standard, a Phase I ESA must include a review of "reasonably ascertainable" federal and state environmental record sources. The purpose of the records search is to identify any RECs associated with the subject property.

5.1 Standard Environmental Record Sources

The records review conducted for this Phase I ESA consisted of evaluating a database search report prepared from EDR of Shelton, Connecticut. The EDR report documents the results of a computerized search of a number of standard federal and state environmental records. These databases contain site-specific information regarding a variety of potential environmental concerns including hazardous waste activities, the operation of aboveground and underground storage tanks, remediation investigations performed by the EPA, and other items.

During the search, the databases are reviewed to identify sites in close proximity to the subject property that may present a potential environmental risk to the property being evaluated. Search radii, ranging from one-eighth mile to one-mile, are utilized based on the degree of potential risk posed by a particular environmental condition, and the proximity of a site with that condition to the subject property. The EDR report uses geocoded addresses that typically mark the center of the property (subject property and identified regulated facility properties), so actual distances may be different than those listed in the EDR report. Harbor conducts ground truthing during the site reconnaissance and via map measurements on Google Earth to verify locations to the maximum extent practicable. The EDR search methodology and data conform to the Standard's requirements for records reviews. The complete EDR report is found in Appendix B (Regulatory Records).

5.2 Standard Environmental Records

The subject property was not identified on any of the databases in the EDR report. Several regulated facilities were identified within the prescribed search radii of the subject property. The names and addresses of the identified regulated facilities and the databases they were identified on are listed in Table 5-1 below. Additional pertinent information follows.

Table 5-1 – Summary of Regulated Facilities

A property owned by the City of Marion (EDR Map ID #A1) was identified on the underground storage tank (UST) database at 133 Hwy 77. The site had an underground storage tank that was permanently removed out of service in October of 1988 and no further action was taken. This property would not be considered a REC relative to the subject property.

Phillips Laundry (EDR Map ID #A2) was identified on the UST and Permit Data System (PERMITS) databases at 135 Hwy 77, approximately 37ft ENE of the subject property. The facility had two underground storage tanks that were both permanently removed from service in June of 1995. The facility also had a permit for these tanks, which is why it was listed on the PERMITS database.

Limited information was available regarding the property, assumedly due to its age. This property would not be considered a REC relative to the subject property.

Marion Exxon Service (EDR Map ID #C6 and C7) was identified on the EDR Historical Auto database at 11 Hwy 77. The EDR report indicates that this facility was in use as a gasoline service station from 1989 to 1995. No other information about the facility was provided in the EDR report. The site would not be considered a REC relative to the subject property.

Marion BP was (EDR Map ID #13 and D14) was identified on the DEQ UST, LTANKS, Permits, and Financial Assurance databases at 210 Military Road, which is currently occupied by the vacant former gas station. The EDR report indicates that this facility was in use as a gasoline service station from 1973 to 2018. This facility previously had four USTs installed in 1973 and permanently removed form service in 1993 due to tank and line leaks. The leaks were remediated, and a no further action letter was issued. An addition four USTs were added as replacements for the original tanks in 1994. These tanks were permanently removed in 2018. Soil sampling conducted in June of 2018 revealed elevated levels of benzene in the samples due to past leaks. Remediation efforts are currently taking place. Due to the nature of the leak and the proximity of the former gas station to the subject property, this facility would not be considered a REC relative to the subject property.

Review of the records for the remaining sites listed in Table 5-1 indicate that, either based on topography or regulatory issues, none of the remaining sites would adversely impact the subject property.

5.3 Additional Environmental Record Sources

Several local governmental agencies were contacted to obtain additional information on the property. Pertinent information is provided below:

5.3.1 Fire Department

Harbor contacted the Marion Fire Department Fire Inspector Freddie Thorne to determine if they have any record of past releases of hazardous substances or petroleum products on or near the subject property. Inspector Thorne responded that they had no records regarding the subject property.

5.3.2 Health Department

Harbor contacted Mr. Ryan Christensen, Assistant Environmental Manager, with the Arkansas Department of Health (ADH) to determine if they have inspected the subject property or adjacent properties for environmental reasons. Mr. Christensen responded that they had no records regarding the subject property.

5.3.3 Zoning Department

Harbor contacted Mr. Ed Cain with the City of Marion Planning Commission to determine if any building code violations have been issued to the subject property. No response has been received as of the issuance of this report.

5.3.4 Prior Reports and Other Documentation

DEQ provided Harbor a copy of a hazardous materials survey of the gymnasium building conducted by Tioga Environmental Consultants, Inc. (Tioga) in July 2022. The survey was performed to identify asbestos containing materials (ACM), lead-based paint (LBP), and miscellaneous hazardous materials on the subject property. The hazardous materials survey indicated the presence of ACM, LBP, and other hazardous materials

5.4 Physical Setting Source(s)

The ASTM Standard requires that the current USGS 7.5-minute topographic map for the subject property be reviewed as a standard source of information of the physical setting of the property. The subject property is located on the West Memphis, AR quadrangle (2020). Review of these maps show that topography at the subject property and surrounding areas is generally flat at an elevation of approximately 222 feet amsl.

To obtain additional information on the property, Harbor obtained a supplement to the standard EDR report. This document, the *GeoCheck® Physical Setting Source Addendum*, provides a variety of physical data on the subject property. The information is retrieved from a number of environmental databases. The complete EDR report, including the GeoCheck® Addendum, is found in Appendix B (Regulatory Records).

5.4.1 Surface Water Characteristics

No surface water is currently located on the subject property. Surface water on the subject property (stormwater runoff) enters the Marion storm sewer system or runs overland. The nearest mapped natural drainage is a remnant oxbow lake which is located approximately .30-mile east of the subject property.

5.4.2 Soil, Geologic and Hydrogeologic Characteristics

The subject property is in the Mississippi Embayment physiographic region of Arkansas. The Mississippi Embayment is characterized by unconsolidated to semi-consolidated Quaternary- to Tertiary-aged sediments. According to the *Geologic Map of the West Memphis Quadrangle* (2002), the site and surrounding areas are underlain by Quaternary-age stream overbank alluvium and channel meander alluvium deposited by the Mississippi River. These deposits generally consist of "alluvial sediments of present streams and include gravels, sands, silts, clays, and mixtures of any and all of these" (*Stratigraphic Summary of Arkansas*, 2004).

These deposits also comprise the Mississippi River Valley Alluvial Aquifer, which underlies the area and contains the uppermost occurrence of groundwater. Based on general characteristics of the alluvial aquifer, groundwater below the general area is likely unconfined and contained within the pore spaces of the underlying sediments. (*Groundwater Atlas of the United States, Segment 5 – Arkansas, Louisiana, Mississippi,* 1998).

The EDR report includes information for surface soils occurring on the subject property. Soils indicated for the subject property are classified as Dundee silt loam, which are somewhat poorly drained soils, with moderately fine or fine textures, and slow infiltration rates.

5.4.3 Flood Zone Map

The FEMA flood plain map for the subject property was provided in the EDR report. According to flood panel 05035C0330E, the subject property is located in zone X, which has less than a 0.2 percent annual chance flood hazard (see the EDR report in Appendix B).

5.4.4 Well Information

A total of 15 wells were identified in the EDR report within one mile of the subject property. One public supply water well was identified within one mile of the subject property. Four of the wells were identified as wells measured periodically by USGS for aquifer levels. Nine of the wells were identified as environmental groundwater monitoring wells. One of the wells was identified as private water supply well.

5.5 Historical Use Information on the Property

Review of historical aerial photographs, topographic maps, and city directories shows that the subject property has been in use since at least 1919. Additional information regarding the history of the subject property is summarized below.

5.5.1 Topographic Maps

Current and historical topographic maps of the area were reviewed for this Phase I ESA. 7.5-minute topographic maps available from USGS were published from 1916 to 2020. The 1916, 1925, and 1927 maps appear nearly identical and shows a few structures on the subject property and adjacent properties. With the remaining areas being undeveloped pastureland. Military Road can be seen on the topographic map along with the rail line that runs to the east of the subject property.

The 1939, 1940, 1955, and 1960 maps show the subject property and surrounding areas as relatively unchanged from the preceding maps. A few structures appear on the maps in surrounding areas but all buildings on the subject property and surrounding areas remain unlabeled. Highway 77, that runs to the east of the subject property paralleling the rail line can be seen on topographic maps beginning in 1939.

The 1966 map is significantly more detailed than the previous maps. The only structure shown on the subject property is the current structure. The surrounding areas see increased development than previous maps. The structures to the south, across military drive from the subject property, are listed as the Marion High School. The 1973 map shows increased development in Marion to the north and the south of the subject property as residential areas begin to expand into undeveloped areas.

The next map is published in 1993. The subject property and adjacent properties remain relatively unchanged from previous maps with urban expansion being seen across the area. Remaining maps show minimal features on the subject property and surrounding areas, typically for these era maps. Copies of the topographic maps are included in Appendix D (Historical Documentation).

5.5.2 Fire Insurance Maps

Historic Sanborn Fire Insurance maps, dated 1913, 1919, and 1930 were provided by EDR that covered the subject property. The 1913 map does not show any structures on the subject property or any adjacent properties.

The 1919 map shows two structures on the subject property. One is labeled as a Baptist church and the other is labeled as a lodge hall. The adjacent property to the east is labeled as a garage with a 500-gallon buried tank on the southwest corner of the structure. The contents of the tank cannot be identified due to illegible writing. To the south of the subject property, across Military Road, the Marion High School can be seen. It was constructed in 1912 using fireproof construction methods along with brick walls and reinforced floors.

The 1930 map shows the buildings on the subject property as unchanged from the previous map, with an unlabeled building appearing to the east of the lodge hall and Baptist church. The adjacent property to the east is marked as no longer in use, which there was an auditorium-gymnasium constructed on the south side of the Marion High School. Surrounding areas show a few residential buildings. To the east of the subject property, on the south side of the intersection of Military Road and Highway 67 (Hwy 77), there was a filling station and an auto repair shop. On the north side of that intersection, there was another filling station and auto repair shop as well. Copies of the Sanborn maps are included in Appendix D (Historical Documentation).

5.5.3 Aerial Photographs

Current and historical aerial photographs of the subject property were reviewed for this Phase I ESA. Aerial photographs provided by EDR were published from 1953 to 2017. The 1953 photo shows the existing building on the subject property. The areas surrounding the building appear to be lightly vegetated. The adjacent property to the east has two apparent residential structures on it. The adjacent property to the south is occupied by the high school, while the subject property to the west and north have residential dwellings on them.

The 1963 photo does not show much change from the 1953 except for slightly increased development in both commercial and residential areas. The 1969 map appears very grainy and is difficult to decipher.

The 1973 through 1985 photos clearly show the existing structure on the subject property, with a paved area appearing on the north side of the structure. Surrounding properties

also appear as described in previous sections, except for increased development and renovations at the school on the adjacent property to the south, increased residential development appears to the south and east of the subject property, while development to the west appears largely commercial. The 1990 and 1994 photos are very grainy and appears largely unchanged from the 1985 photo.

The 1997 and 2002 photos show the subject property and adjacent properties largely unchanged with increased development in surrounding areas.

The remaining aerial photos show no change to the subject property and minimal change to the adjacent properties. Increased commercial/light industrial development is evident in the surrounding areas to the east, west, and south over time. Copies of the photographs are presented in Appendix D (Historical Documentation).

5.5.4 City Directories

City directories for the subject property and surrounding properties were reviewed for this Phase I ESA. City directories were published by EDR in 2010, 2014, and 2017. The subject property (54 E. Military Road) was listed on the 2010 city directory as being owned by William P. Rainey. In 2014 and 2017 the name listed on the city directory changed to Rainey W Pal DGN ATTY. Copies of the city directories are presented in Appendix D (Historical Documentation).

5.6 Historical Use Information on Adjoining Property

The historical aerial photographs, topographic maps and city directories indicate that the historical land use within the area of the subject property has seen continued development since at least the early 1930s. Additional information regarding the adjoining properties is provided in the previous sections.

6.0 Site Reconnaissance

The Standard identifies a number of site conditions that may cause or contribute to a "recognized environmental condition" associated with a particular property. These items include the presence of hazardous substances in various containers, storage tanks, electrical transformers, and solid wastes. An integral component of any Phase I ESA is a reconnaissance of the subject property. During the site visit, the subject property and any structures located therein are visually and physically observed. The primary purpose of the survey is to develop information on the aforementioned environmental considerations.

6.1 Methodology and Limiting Conditions

Archival research, interviews, and visual site inspections were used to obtain the necessary information for preparation of this Phase I ESA. During the visual inspection, Harbor personnel used information gathered from the archival research and interviews to identify possible contaminant source areas. Features inspected included: floors, drains, soils and vegetation, buildings, and related support equipment. The visual inspection also examined adjacent property (to the extent possible) to identify potential sources of contamination that might have migrated or could migrate onto the subject property.

6.2 General Site Setting

Mr. Thomas Huetter, P.G., Senior Project Manager, inspected the property on October 10, 2022. The weather was clear and in the low 80s. The qualifications of Harbor's Environmental Professionals are presented in Appendix E.

The subject property consists of one tract totaling 0.86-acre currently owned by the Marion School District. The subject property contains one 17,272-square foot, single-story, slab-on-grade structure reportedly constructed in 1938. The building is currently vacant but was previously in use as a gymnasium for the school district. Remaining exterior areas of the subject property are paved or lightly vegetated. Access to the subject property is via Briarwood St. and Currie Ave from E. Military Road.

6.3 Site Reconnaissance Observations

The subject property is currently vacant but has been used as a gymnasium for the school on the adjacent property to the south. The building has reportedly been in use since 1938. The building on the subject property is in overall good condition. No evidence of the building that were on the subject property prior to 1938 was found.

The materials found inside the building were aligned with what might be found in any normal gymnasium/school building including paperwork in filing cabinets, athletic equipment, concession equipment, cleaning equipment, paints, and solid waste disposal receptacles. The outside of the building was lightly vegetated with paved walkways and a paved parking area on

the north side of the building. During site reconnaissance, the south side of the building was decorated for a themed festival taking place in the city.

Review of the Sanborn maps indicates that in the early 1900's there was a church on the northwest portion of the subject property and a lodge hall on the southern portion. No evidence of these structure was found. A garage with an underground storage tank was reportedly located on the southwest corner of the adjacent property to the west. Review of the Sanborn maps indicated that the garage and its UST was removed sometime before 1930. No evidence of this structure was seen during sight reconnaissance.

Five potential environmental issues were noted during the site reconnaissance of the subject property and are identified in the following Table 6-1 (Site Observations). Photos of the subject property and adjacent properties are provided in Appendix A. The findings are discussed in the following pages:

Table 6-1 – Site Reconnaissance Observations

Description		vation	A d d'a' 1 l - 6 a'	
		No	Additional Information	
Hazardous Substances	Х		See Section 6.3.1	
Landfills		X		
Odors		Χ		
Petroleum Products		Χ		
Pits, Ponds, or Lagoons (other than natural)	Χ		See Section 6.3.2	
Pools of Liquid		X		
Potential PCB Equipment	X		See Section 6.3.3	
Solid Wastes	Χ		See Section 6.3.4	
Stained Concrete, Soil or Pavement		Χ		
Storage Tanks (Aboveground)		Х		
Storage Tanks (Underground)		X		
Stressed Vegetation		X		
Unidentified Substance Containers	X		See Section 6.3.5	

6.3.1 Hazardous Substances

A few household cleaners were observed inside of the building along with janitorial supplies. There was also a gallon of paint observed in the building along with hand sanitizer. None of these materials would be considered a REC relative to the subject property.

6.3.2 Pits, Ponds, or Lagoons

A mechanical room on the west side of the building housed an old boiler, above ground storage tank, and an old hot water heater. There was a pit next to the boiler that had a sump inside of it, presumably a discharge point for liquids inside the boiler. This pit had standing liquids inside of it. However, this pit would not be considered a REC relative to the subject property.

6.3.3 Potential PCB Equipment

Two pole-mounted transformers were observed on four different poles on the northeast and northwest sides of the subject property. These transformers are owned by Entergy, who would be responsible for a cleanup in the event of a leak. No evidence of a release to the environment, such as stained concrete or stressed vegetation, was observed below the transformers and as such, the units would not be considered a REC relative to the subject property.

6.3.4 Solid Wastes

Solid wastes inside of the building on the subject property included left-over athletic equipment, concessionary equipment such as refrigerators and drink dispensers, boxes of old paperwork and filing cabinets full of files, and general refuse. None of these items would be considered a REC relative to the subject property.

6.3.5 Unidentified Substance containers

There was an aboveground storage tank next to the boiler that had unidentified liquids inside of it. This tank assumedly was used to hold water for the boiler, although this is unknown.

7.0 Interviews

In accordance with the Standard, a Phase I ESA must include interviews with persons who are knowledgeable about the subject property and adjacent sites. These people should include the property owner, the current occupant (if applicable), a representative of the local zoning department, and others. The purposes of the interviews are (1) to obtain information about current and historical use of the property and neighboring sites, and (2) to identify any RECs associated with the subject property.

Harbor interviewed several persons familiar with the property and adjacent property as part of this assessment. The information gathered during the interviews and other pertinent items are summarized below:

7.1 Interview with Past Owner

A representative of the previous owner was not available for an interview.

7.2 Interview with Current Owner

The current owner/representative, Mayor Frank Fogleman of the City of Marion, completed the Owner Questionnaire. The owner questionnaire is presented as Appendix C.

7.3 Interviews with Local Government Officials

Harbor contacted the City of Marion Fire Department Fire Inspector Freddie Thorne to determine if they have any record of past releases of hazardous substances or petroleum products on or near the subject property. Inspector Thorne responded that they had no records regarding the subject property.

Harbor contacted Mr. Ryan Christensen Assistant Environmental Manager, ADH Central Region to determine if they have inspected the subject property or adjacent properties for environmental reasons. Mr. Christensen responded that they had no records regarding the subject property.

Harbor contacted Mr. Ed Cain with the City of Marion Planning Commission to determine if any building code violations have been issued to the subject property. No response has been received as of the issuance of this report.

8.0 Findings, Opinions, and Conclusions

Harbor performed a Phase I ESA on the building and property located at 54 E. Military Road in Marion, Crittenden County, Arkansas. The project was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527 - 13, "Environmental Site Assessments: Phase I Environmental Site Assessment." Any exceptions to, or deletions from, the Standard are discussed in Section 9.0 (Deviations) of this report. This report will serve to summarize the work performed by Harbor professionals as part of the project.

The subject property consists of one tract totaling 0.86-acre currently owned by the Marion School District. The subject property contains one 17,272-square foot, single-story, slab-on-grade structure reportedly constructed in 1938. The building is currently vacant but was previously in use as a gymnasium for the school district. Remaining exterior areas of the subject property are paved or lightly vegetated.

During the course of this project, Harbor performed a site reconnaissance, reviewed federal, state, and local environmental records, and interviewed persons familiar with the property to ascertain the current and historical use of the property and surrounding areas. **This Phase I ESA revealed zero RECs relative to the subject property:**

Harbor assumes that the information provided by the persons interviewed for this project is correct. The site investigation is limited to those visually observable environmental conditions present on the property at the time of the inspection. Harbor did not have access to the adjoining properties. These sites were only visually inspected from the subject property. This report, and all work performed in conjunction with this report, are for exclusive use of DEQ, the City of Marion, Sultana Historical Preservation Society, Inc. and their agents or assigns. Other entities or individuals may only rely on this report with the express written consent of DEQ, the City of Marion, the Sultana Historical Preservation Society, Inc., and Harbor.

9.0 Deviations

This Phase I ESA was performed in general conformance with the scope and limitations of the ASTM International Practice E 1527 - 13, "Environmental Site Assessments: Phase I Environmental Site Assessment". It should be noted that aerial photographs and topographic maps were not available in five (5) year intervals for the subject area. Additionally, access to some of the structures on the subject property was limited due to structural integrity. However, other sources of information document that development on the property did not change significantly during that time.

10.0 Additional Services

No other additional services were contracted between DEQ and Harbor.

11.0 References

The following people, documents, maps, or other publications may have been utilized specifically in the preparation of this Phase I ESA Report or generally in the development of the report format. References to specific documents are also provided in appropriate sections of the report.

12.0 Environmental Professional Statement

Mr. Caleb Gourley and Mr. Thomas Huetter have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all of the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

We declare that, to the best of our knowledge, we meet the definition of environmental professional as defined in §312.10 of 40 CFR Part 312. Résumés for these individuals may be found in Appendix E.

Caleb Gourley Project Manager

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal leaking storage tanks

LTANKS: Leaking Storage Tank Locations

A review of the LTANKS list, as provided by EDR, and dated 06/13/2022 has revealed that there are 15 LTANKS sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

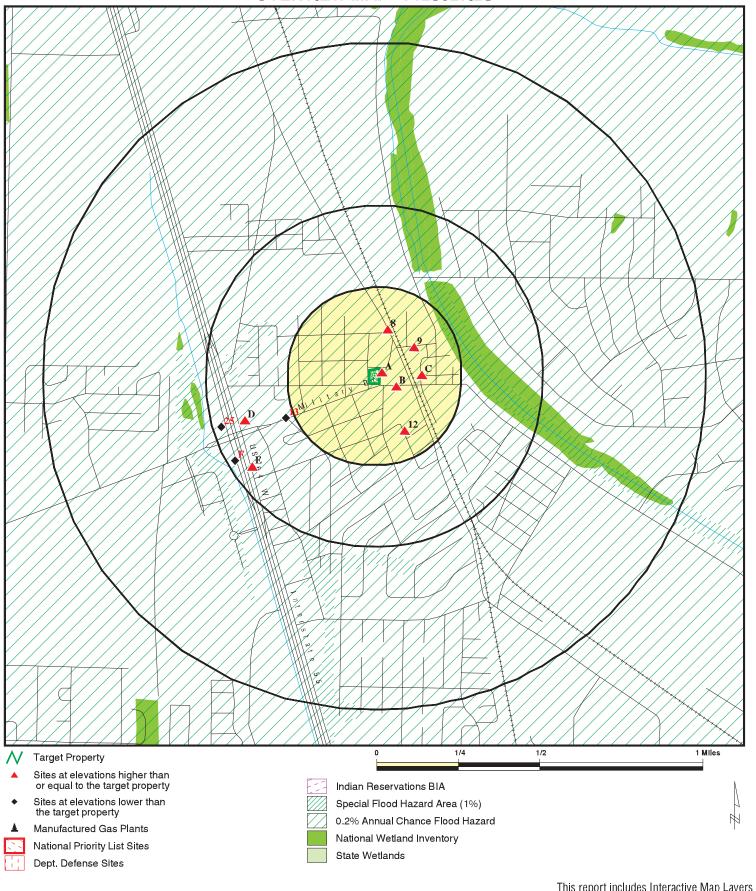

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

IN CONJUNCTION WITH THE PERMANENT CLOSURE (REMOVAL) OF THE FACILITY'S Memo:

REMAINING FOUR (4) UNDERGROUND STORAGE TANKS, SOIL SAMPLES WERE TAKEN ON JUNE 19, 2018 AND SENT BY THE LICENSED CONTRACTOR FOR LABORATORY ANALYSIS. AS PART OF THE PAPERWORK SUBMITTED WITH THE CONTRACTOR'S TANK CLOSURE REPORT TO ADEQ, LABORATORY TEST RESULTS REVEALED ELEVATED LEVELS OF BENZENE FOR FOUR (4) SOIL SAMPLES: NORTH WALL: 1.15 MG/KG EAST WALL: 1.30 MG/KG WEST WALL: 2.50 MG/KG BACKFILL COMPOSITE: 1.42 MG/KG A SEARCH OF THE ADEQ HISTORY OF THE FACILITY REVEALED THE EXISTENCE OF A PAST UNDERGROUND LINE LEAK, DATED AUGUST

BLACK PRODUCT FOUND IN NE WELL DURING A COMPLIACE INSPECTION Leak Damage: Memo:

ANDY MORRIS WITH FLASH MARKET LLC REPORTED A SUSPECTED RELEASE. BLACK OLD PRODUCT WAS FOUND IN TWO MONITORING WELLS. SCOTT'S UNDERGROUND

WAS CALL TO TEST THE SYSTEM. [Last modified by Robert Morgan on

8/18/2020 3:52 PM] SCOTT'S UNDERGROUND CONSTRUCTION CONDUCTED A SYSTEM TIGHTNESS TEST ON 8/20/2020 AND FOUND THE SYSTEM TO BE TIGHT. MR. MORRIS WAS ADVIDED BY SAM MCDUFFIE, INSPECTOR SUPERVISOR, TO REMOVE THE PRODUCT FROM THE WELLS AND OBSERVE THE WELL FOR SEVERAL MONTHS TO SEE IF THE PRODUCT RETURNS. PRODUCT DID NOT RETURN BUT THE WELLS CONTINUED TO BE OBSERVED. ON 12/13/2021 A COMPLIANCE INSPECTION WAS CONDUCTED AND THE RST INSPECTOR FOUND 2 INCHES OF BLACK PRODUCT IN THE NE WELL. THE LUST WAS CONFIRNED AT THAT TIME. THE CONFIRMED LUST WAS REFERRED TO LOUIS CHACON, INSPECTOR SUPERVISOR, ON 12/17/2021 FOR FURTHER ACTION. [Last modified by Robert Morgan on

Memo: 01-18-12 - ON 1/18/2012 AND 1/19/2012 THE DIESEL TANKS ON THIS

PROPERTY WERE REMOVED. ON 1/19/2012 SAMPLES WERE TAKEN FROM BORINGS IN THE GASOLINE TANK PIT, PIPING TRENCH, AND DISPENSERS TO ASSESS THE SYSTEMS ELIGIBILITY FOR CLOSURE IN PLACE. THE SAMPLE RESULTS WERE EMAILED TO CLARK BAKER ON 1/30/2012. THE SAMPLE RESULTS SHOWED LEVELS OF GASOLINE CONTAMINATION ABOVE THE ALLOWABLE LIMITS. Ibakerclark

2/7/2012 10:26:00 AM]. 01-30-12 - Flash Market reports a gasoline release at Flash Market #152; 03-01-12 - THE SYSTEM WAS GASOLINE

SYSTEM WAS CLOSED BY REMOVAL. THE AREA WAS OVER-EXCAVATED PRIOR TO SAMPLES BEING TAKEN. THE SAMPLE RESULTS WERE RECEIVED ON 3/30/2012.

THE POST CLOSURE SAMPLES STILL SHOWED LEVELS OF CONTAMINATION ABOVE THE ALLOWABLE LIMITS. 04-16-12 - THE LUST WAS REFERRED TO INSPECTOR SUPERVISOR FOR REVIEW. [BAKERCLARK 4/16/2012 11:24:09 AM]. [SMCDUFFIE

4/19/2012 10:56:09 AM]. 04-19-12 - FACILITY REFERRED TO TECHNICAL BRANCH ON 4-19-12 FOR FURTHER REVIEW. [SMCDUFFIE 4/19/2012 11:41:50

AM]. 04-26-12 - Site Inspection and Receptor survey performed by Gerald Delavan, P.G. and Jarrod Zweifel. RST Geologist; 05-23-12 - Preliminary Assessment completed; 06-04-12 - Letter requesting SAWP and Cost Estimate sent out; SAWP due July 04, 2012; 09-28-12 - TRUST FUND ELIGIBLE. LETTER DATED SEPTEMBER 28, 2012. [PAES 10/9/2012]

7:59:38 AM]. 08-23-12 - SAWP approval letter sent out; [GLD 12/11/2012 11:17:49 AM]. 03-26-13 - LIF Site Assessment Report recived; determined sub-slab vapor monitoring will be required if building is to remain; 05-30-13 - Letter requesting Sub-Slab Vapor Monitoring sent out; vapor monitoring will be required if intended

future use for the building is to remain intact and not be demolished; it was later determined the RP wants to demolish the store building, thus eliminating any vapor intrusion issue. 08-21-13-

Exposure Assessment completed; recommended submittal of FPRWP. 08-14-13 - Letter from MAPCO concerning Leasee Agreement and current property ownership: 08-26-13 - Letter requesting FPRWP & CE sent out; FPRWP due September 14, 2013. [GLD 8/27/2013 10:23:01 AM]. [GLD 12/12/2013 10:10:03 AM]. Free Product Removal Wor k Plan received on

12/30/13. Case file re-assigned to D. Frazier on 01/21/14. [frazier 1/22/2014 2:01:35 PM]. Correspondence issued on 02/10/14 rescinding

the EA and the request for a Free Product Removal Work Plan; instead, requested an Additional Site Assessment Work Plan. [frazier 3/6/2014 8:59:49 AM]. Additional Site Assessment Work Plan received on 04/16/14. Revisions requested on 04/21/14. Revised Additional Site Assessment Work Plan received on 04/29/14. [frazier 5/2/2014 3:29:08 PM]. Approval of Site Assessment Work Plan & Cost Estimate for \$61,081.39. (J. Ward 10/15/14) Case re-assigned to J. Ward on 07/08/14. (J. Ward 10/15/14) Received Additional Site Assessment Report on 09/17/14. (J. Ward 10/15/14) Request for 2nd Additional Site Assessment Work Plan and Cost Estimate sent on 10/14/14. (J. Ward 10/15/14) Change Order #1 was submitted by Heather Pettus (SEMS, Inc.) on 10/14/14 for removal of damaged monitoring well (MW-1). Change Order #1 was received by ADEQ on 10/17/14. A revision request was made by ADEQ on 10/21/14. The Revised Change Order #1 was received by ADEQ on 10/28/14. The Change Order #1 was approved by the RST Division on 10/29/14. The monitoring well (MW-1) was plugged & abandoned on 10/30/14. (J. Ward 01/05/15) Scoping meeting was conducted via teleconference with Heather Pettus (SEMS, Inc.), Jeff Ward, David Frazier, and Daniel Clanton on 10/23/14. (J. Ward 01/05/15) A Monitoring Well Decommissioning Report was received on 11/19/14 via email from SEMS, Inc. that detailed the field activities and satisfied requirements of Change Order #1. (J. Ward 01/05/15) The 2nd Additional Site Assessment Work Plan & Cost Estimate (Vapor Intrustion Study) was submitted to ADEQ by Heather Pettus (SEMS, Inc.) on 12/04/14. (J. Ward 01/05/15) A Request for Revisions to the 2nd Additional Site Assessment Work Plan & Cost Estimate (Vapor Intrustion Study) were issued by ADEQ to Heather Pettus (SEMS, Inc.) on 12/18/14. (J. Ward 01/05/15) 2nd Additional Site Assessment Work Plan & Cost Estimate (Vapor Intrusion Study) - REVISION 1 was submitted to the RST Division on 01/13/15. (J. Ward 03/27/15) 2nd Additional Site Assessment Work Plan & Cost Estimate (Vapor Intrusion Study) - REVISION 1 was approved by the RST Division on 01/30/15. (J. Ward 03/27/15) Reimbursement Application #5 - Technical Review on 03/31/15. (J. Ward 05/27/15) 2nd Additional Site Assessment Report (Vapor Intrusion Study) was submitted by SEMS, Inc and received by the RST Division on 06/23/15. (J. Ward 08/03/15) An email requesting a Change Order be submitted to RST Division to conduct a second round of soil vapor sampling was sent to SEMS, Inc. on 08/11/15. (J. Ward 12/17/15) Change Order #1 was submitted to the RST Division on 08/20/15. (J. Ward 12/17/15) Change Order #1 was approved by the RST Division on 08/28/15. (J. Ward 12/17/15) The 2nd Additional Site Assessment - 2nd Vapor Sampling Event Report was received from SEMS. Inc. on 11/23/15. (J. Ward 12/17/15) Request for Corrective Action Plan & Cost Estimate sent to consultant and RP on 12/29/15. (J. Ward 01/29/16) Scoping meeting via telephone conference call conducted on 01/07/16 with ADEQ Staff and Heather Pattus (SEMS, Inc.). (J. Ward 01/29/16) Corrective Action Plan & Cost Estimate was received on 02/18/16 from SEMS, Inc. (J. Ward 03/14/16) Approval of CAP & Cost Estimate on 03/03/16. (J. Ward 03/14/16) Received Proof of Publication on 03/28/16. (J. Ward 05/02/16) Notice to Proceed issued to SEMS, Inc. on 04/11/16. (J. Ward 05/02/16) Change Order #1 for Corrective Action Plan submitted on 05/13/16. (J. Ward 05/17/16) Change Order #1 for CAP approved on 05/13/16. (J. Ward 05/17/16) Change Order #2 for CAP submitted on 05/17/16. (J. Ward 05/17/16) [WARDJ 5/17/2016 1:36:26 PM]. Case management duties re-assigned to D. Frazier on 8/9/16. [frazier 8/9/2016 8:51:29 AM]. Corrective Action Report received on 9/7/16. Requested publication of 280.67d

3/24/06. 3/28/06 (M Shinn) "Groundwater Site Assessment" report submitted. [shinn 3/30/2006 10:02:46 AM]. Case file re-assigned to D. Frazier on 04/28/10. Conducted site visit on 05/03/10, at which time 32" of free product diesel was observed in the diesel UST observation well; adjacent creek did not appear to be impacted, abundant aquatic life observed. [frazier 5/17/2010 10:11:49 AM]. On 07/19/10, requested 2nd Additional Site Assessment Work Plan. [frazier 8/2/2010 1:13:44 PM]. On 08/04/10, RSTD staff hosted a scoping meeting with the consultant to discuss strategies for the site assessment. [frazier 8/30/2010 8:56:18 AM]. 2nd Additional Site Assessment received on 12/27/10. Work Plan revisions received on 01/18/11. Approval of 2nd Additional Site Assessment issued on 01/27/11. [frazier 2/1/2011 2:01:38 PM]. Received on 03/31/11, correspondence from consultant requesting assistance in obtaining property Access Agreement; request referred to RST Division, Enforcement Branch on 04/01/11. [frazier 4/4/2011 10:35:14 AM]. Copy of Access Agreement from property owner received from consultant on 06/02/11. Revised reporting schedule for 2nd Additional Site Assessment Report issued on 06/03/11. [frazier 7/5/2011 1:10:40 PM]. 2nd Additional Site Assessment Report received on 10/04/11. [frazier 11/1/2011 2:41:00 PM]. Monitoring Report received on 11/22/11. [frazier 12/9/2011 1:09:53 PM]. Exposure Assessment completed on 12/07/11, recommending free product removal. On 10/04/12, 2nd Additional Site Assessment Work Plan cancelled & requested Free Product Removal Work Plan. [frazier 2/6/2012 8:48:33 AM]. Technical Branch staff hosted a scoping meeting with consultant on 02/07/12. [frazier 3/5/2012 8:24:51 AM]. Free Product Removal Work Plan received on 06/13/12. [frazier 7/2/2012 3:26:07 PM]. Requested Revised Free Product Removal Work Plan on 07/20/12. [frazier 8/7/2012 1:04:45 PM]. Revised Free Product Removal Work Plan received on 08/14/12. [frazier 9/5/2012 8:31:40 AM]. Additional revisions to Free Product Removal Work Plan requested on 09/06/12. [frazier 10/1/2012 8:31:30 AM]. 2nd Revised Free Product Removal Work Plan received on 10/18/12. [frazier 10/31/2012 2:36:19 PM]. 3rd Revised Free Product Removal Work Plan requested on 12/12/12. [frazier 1/14/2013 1:25:21 PM]. 3rd Revised Free Product Removal Work Plan received on 06/27/13 and approved on 09/05/13. [frazier 9/25/2013 3:21:02 PM]. Received, on 11/15/2013, correspondence from consultant informing that Responsible Party had ordered cessation of corrective action activities. Ten-day demand letter issued on 11/19/13. [frazier 12/2/2013 2:44:01 PM]. Response to demand letter received from consultant on 12/17/13 stating that work would proceed. Work plan implementation began in January, 2014 and concluded around May, 2014. Waste manifests were submitted in reimbursement application #5; however, no formal "corrective action report" ever received. On 05/19/15, RST issued final demand letter for cooperation through a new consultant. No response ever received from "RP". State lead action authorized under cost code# 17102. Request for contractor services from on-call contractor Southern Co. issued on 02/23/16, requesting a monitoring well decommissioning work plan. [frazier 3/1/2016 2:35:44 PM]. A Free Product Removal Report and UST Closure Report was received from SCS Environmental on 3/14/16. [frazier 3/15/2016 4:01:04 PM]. Monitoring Well Decommissioning Work Plan received from The Southern Co. NLR on 03/22/16 and approved on 03/29/16. [frazier 4/1/2016 10:05:05 AM]. Monitoring Well Decommissioning Report received from The Southern Co NLR Inc. on 4/25/16. [frazier 4/26/2016 3:48:41 PM]. Site reconnaissance by Frazier and McWilliams on 4/28/16. Case closed by

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation: 222 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 15605100 WEST MEMPHIS, AR

Version Date: 2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

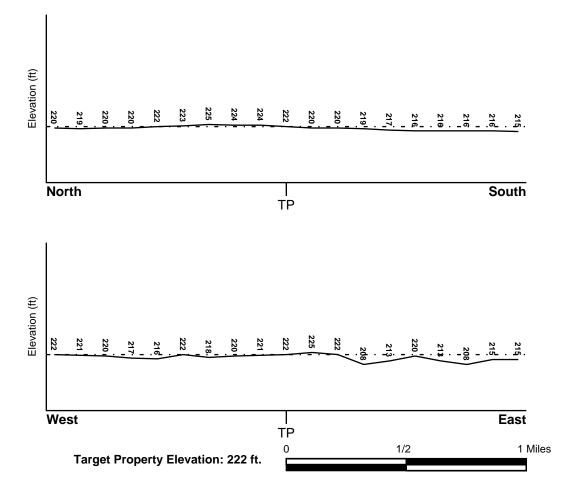

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property FEMA Source Type

Additional Panels in search area: FEMA Source Type

05035C0335E FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

WEST MEMPHIS YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Dundee

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 77 inches

Soil Layer Information							
	Bou	ındary		Classif	fication	Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)
1	0 inches	7 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5
2	7 inches	51 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5

Soil Map ID: 2

Soil Component Name: Tunica

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 30 inches

Soil Layer Information							
	Boundary			Classification Saturated hydraulic			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Oon Nouvelon

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: US Fish & Wildlife Service

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Harbor Environmental Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	Target Street	Cross Street	<u>Source</u>
