Oct 13, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Ellen Tubbs

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:14:12 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. David Bieritz

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Laura Bloom

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Dara Murray

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:13:35 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Conni Wireman

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Max Stein

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:13:18 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Glenn Hufnagel

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Deborah Fitzgerald

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:12:51 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Alyson Boyer Rode

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Linda Marticek

Dear Director Keogh,

My wife and I visited the Buffalo National Scenic river in the fall of 2016, and it was a beautiful pristine place. Please keep it that way and deny this permit to a nearby hog farm! We want to return to the same beautiful place in a few years.

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Leslie Karnauskas

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Edward Bernardin

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

Usually, I don't comment on affairs of other States, but the National Parks are shared by all of us. I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Dennis Eicholtz

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Dr. Lauret Savoy

Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Phyllis Newburn

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 2:14:19 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Thomas Huzij

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Our country's wild rivers are precious; we must do all we can to protect their sanctity. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo. It is so much easier to prevent problems than to have to remediate to correct pollution.

Sincerely,

Mrs. Phyllis Wahlberg

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Miss Angela Ramirez

Date: Thursday, October 11, 2018 1:42:53 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Lisa Fortes

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Robert Clark

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Riley Canada II

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:42:44 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Colleen Cleary

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:14:20 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Michael Salzmann

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Cathy Jones

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:48:54 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Leland Long

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Susan Fray

Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

This is of critical importance to me. Therefore, I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Martha Walsh

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

This is of MAJOR SIGNIFICANCE. Hog farms and surface water pollution had a long and very bad relationship. The water bodies loose almost every single time. We are not the only creatures who depend on clean water for survival. Any National River deserves to be protected. If C&H can not propose and develop a method that totally protects the Buffalo River from any harm from their operations, they should not be granted a permit. That is both sound economic and environmental practice.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Lois White

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Drew Reese

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Doug Unangst

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

There are fewer and fewer bodies of water and rivers that are algae free. It is sickening to see the results of releasing too much fertilizer into our precious water resources. Please realize how important this issue is to tourism, and the wild species that depend on clean water!

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Marcie Clutter

Dear Director Keogh,

If this were an coal or nuclear power plant, there would be no hesitation to require that there be NO waste allowed to enter the river and probably a limitation on even the temperature of the cooling water discharged into the river. Why would consideration of allowing discharge of the liquid waste from a hog farm, even for a minute, be considered as acceptable?

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Rhonda Mulroy

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:45:33 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Jennifer Philp

Dear Director Keogh,

Untreated waste does not belong in any river. It's about time that animal waste be put on the national stage. If the ADEQ won't respond with detailed & critical information, it is already a disingenuous party that will no doubt continue on a dishonest path of company malfeasance to the public. No hog farm should be allowed to pollute any river.

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Paul Boardman

North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. David Slater

Now a personal note from me. I'm way beyond being respectful; I'm pissed off. This monstrosity never should have been allowed in the watershed of the Buffalo River or any other river. Get off your ass and shut it down. At least do that much.

Sincerely,

Jeffrey Williams

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:44:54 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Maria Ross

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Shay Grauberger

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Donna Cash

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 1:44:22 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Carol King

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Miss Michelle Putze

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

When you decide on the demands of the C&H Hog Farm, Inc , I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of their application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Elke Hoppenbrouwers

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Donna Mulvey Gieber

Dear Director Keogh,

My father was raised near the river and fished and hunted along the river prior to leaving to enlist in the Navy to serve in WWI. He took me to fish with him from the time I was 3 years of age. This experience in my earliest memory now. My first fishing trip was 80 years ago.

I recently visited the river while consulting for the City of Fayetteville, AR. I am requesting that you not approve any action that would disturb the natural and pristine beauty of this free-flowing river.

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments and please protect the Buffalo.

Sincerely,

Mrs. Leonor Molina

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Deborah Mahoney

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:47:59 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Gwendolyn Karan

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Guillermo Romero

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Patricia Leppala

Dear Director Keogh,

As you continue your review efforts, please take a long-term perspective. In most instances, short-term financial gains are more than offset by the future cost to correct pollution. Since I became a grandfather, I now ask myself - what will this mean to my grandchildren? Today we confront far too many environmental issues, because my parents generation was simply not focused on matters like this.

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Cathy Cox

Date: Thursday, October 11, 2018 2:18:36 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. J Beverly

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 2:18:28 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Jutta Helm-Stone

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 2:18:17 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Karan Keller

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Laura Link

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Irene Dobrzanski

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:50:14 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Catherine Whiteside

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

Especially after the disastrous consequences of hurricane Florence in North and South Carolina in which waste ponds from hog farms overflowed and contaminated rivers, streams and groundwater, it is essential that our beautiful natural environment as well as human health be protected. The United States is unique among countries of the world in prioritizing our natural environment and protecting nature for future generations. This should continue to be our national priority and overriding policy.

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Kathy Sugarman

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Glenn Richardson

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:49:57 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Pam Zimmerman

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:49:44 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Miss Cindy Reyes

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:49:39 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Amy Stoddard

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Nancy Hollis

Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mrs. Celene Lyon

Date: Thursday, October 11, 2018 5:49:17 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Tom Koven

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:49:12 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Patrick O'Connor

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Debra Dragonheart

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:48:31 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

The recent disastrous flooding in the Carolinas, and the over-flow of millions of gallons of toxic waste from their factory farms should offer more than ample reason to deny the C&H permit.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Peter Keay

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:48:27 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Cynthia Florenzen

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:48:17 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Miss Audrey Basson

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. James R Monroe

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Marjorie Millner

Dear Director Keogh,

Please honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work and it is clear that hog farms have no place in the Buffalo National River watershed.

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors (like me) and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo; I grew up floating this river and gently camping on its banks. I submit this comment and sentiment in memory of my father; this was his FAVORITE place to be.

Sincerely,

Dear Director Keogh,

The very thought of the likely environmental degradation that would ensue from operation of the commercial hog farm, is highly distressing. You have a beautiful river, that should remain protected from the broadly damaging effects of hog farm operations. The Buffalo River watershed, and the people of Arkansas, deserve a pollution-free future!

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Mark Lolli

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Cathy Ashley

North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Ann Tagawa

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:50:50 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Shawn Gilbert

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Ramon Saldana

North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Ms. Illana Naylor

Subject: Final denial of C&H Hog Farm, Inc.'s application for Permit 5264-W
Date: Thursday, October 11, 2018 5:50:27 PM

Oct 11, 2018

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

I respectfully ask that you honor the work of scientific experts, follow the facts, and protect the Buffalo National River by issuing the final denial of C&H Hog Farm, Inc.'s application for a Regulation 5 Permit. Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river. Please stand by the state's preliminary decision and deny C&H's application for a Regulation 5 Permit once and for all.

Thank you for the opportunity to submit comments to help protect the Buffalo.

Sincerely,

Mr. Joseph Rugloski

Arkansas Department of Environmental Quality (ADEQ) has done its work. Now it is up to you!

Just a few days ago Hurricane Florence turned a good part of eastern North Carolina into a swill pit of toxic coal ash and hog waste demonstrating the power of pig manure to pollute waterways. Any flooding event can cause a catastrophic spill of waste into the Buffalo National River, and nutrients from C&H may already be leaching into the river by way of groundwater pollution.

ADEQ has determined that the application C&H filed for a Regulation 5 Permit fails to provide detailed and critical information required by the State's Liquid Animal Waste Management Systems.

The state of Arkansas can take a giant step in protecting the health of the Buffalo River and the health of thousands of visitors and residents who enjoy America's first national river.
