

Support Your Local Recycler

Garland County

LandFill

Hot Springs

Drop-off Established: 2005

Curbside Started:

Accomplishments:

Our employees are doing their part in keeping the environment clean and safe. They are also making recycling a priority to save our landfill from filling up.

Challenges:

Recycling is a cost to our county, but in the long run it will save air space in our landfill. That's a big pay off.

Plans:

We are in the process of getting more customers involved in recycling. The key is education. If you make it simple they will follow your lead. We also are shopping around for better prices on our recycled materials.
