Dear Mr. Canada:

After reviewing your request of April 6, 2007, we have determined that none of the bodies of water being considered for higher levels of chloride and sulfate have been approved or are being considered for use as a public water source. However, you may wish to contact the county Environmental Health Specialist to ascertain if any of the streams and tributaries of interest are being used as private drinking water sources.

If you have any questions, please do not hesitate to call me at 501-661-2623.

Sincerely,

Robert Hart, P.E., Director
Engineering Section
