Subject: Turk pollutants

Dear Mr. Szenher, please do whatever you can to keep the Turk coal power plant from increasing its toxic pollutant injections into our rivers, land, and air. If they did not estimate their waste materials accurately when applying for the permit, then they must bear the consequences of their mistake. Our health, our economy, and our future survival are already suffering enough. We cannot allow them to speed the pace at which these deadly effects are accumulating for our future generations.

Thank you for your attention. Barbara Jarvis, 5 Charleston Place, Little Rock, AR 72205.
