Introduction

This report contains test results for toxicity testing for the Magcobar Mine Site. The NPDES permit number is AR0049794. The facility is located one mile northeast of Magnet Cove in Sections 10, 11, 14, & 15, Township 3 South, Range 17 West in Hot Springs County, Arkansas. The facility discharges into Chamberlain Creek, thence to Cove Creek, thence to Quachita River in Segment 2F of the Ouachita River Basin.

The permit requires chronic biomonitoring testing once per month for both *Ceriodaphnia dubia* and *Pimephales promelas*. The test results in this report represent the testing for July of 2003.

Plant Operations

To be provided by permittee.

Source of Effluent and Dilution Water

Effluent samples were collected as follows:

| Sample Collection: | Date, Time Started | Date, Time Ended |
|--------------------|--------------------|------------------|
| Sample #1: | 7-23-03, 1500 | 7-24-03, 1500 |
| Sample #2: | 7-24-03, 1445 | 7-25-03, 1445 |
| Sample #3: | 7-28-03, 1045 | 7-29-03, 1045 |

The sample was a composite collected at the final discharge from the Magcobar mine site.

The following information was collected upon immediate receipt of the samples at the laboratory:

| Sample Receiving Information: | Date, Time Sample(s) Received | Temperature (°C) |
|-------------------------------|-------------------------------|------------------|
| Sample #1: | 7-24-03, 1559 | 3 |
| Sample #2: | 7-25-03, 1622 | 2 |
| Sample #3: | 7-29-03, 1710 | Not Taken |

Chain of custody documentation is located in Appendix A.

The permit designates the receiving water to be used as dilution water for the toxicity tests. Synthetic dilution water was substituted either because zero flow conditions existed or due to an earlier characterization of the receiving water as being toxic.

Each sample was analyzed for pH, hardness, total alkalinity, and conductivity. Results are provided in Appendix B.

Dilution Series

Five dilutions in addition to a control (0% effluent) were used in the toxicity tests. The dilutions, which were made with synthetic water, were 32%, 42%, 56%, 75%, and 100%. The low-flow effluent concentration (**critical dilution**) was defined as **100% effluent**.

Test Methods

EPA Method 1000.0, Fathead Minnow, *Pimephales promelas*, Larval Survival and Growth Test, was used in this bioassay. Larvae are exposed in a static renewal system for seven days and the results are based on the survival and growth (increase in weight) of the larvae. There were no deviations from the reference method. The test chambers were 500 ml plastic cups, and each chamber contained ten organisms in a test solution volume of 250 mls. The test temperature was 25 degrees Centigrade. Raw data and statistics are provided in Appendix C.

EPA Method 1002.0, Cladoceran, *Ceriodaphnia dubia*, Survival and Reproduction Test, was also used. Neonates are exposed in a static renewal system until at least 60% of the control organisms have produced a third brood. Results are based on the survival and reproduction of the organisms. One neonate was placed in each of ten replicate chambers using a randomizing template. Test chambers were 30 ml plastic cups filled with 15 ml of test solution. The test temperature was 25 degrees Centigrade. Raw data and statistics are provided in Appendix D.

Test Organisms

The organisms used in Test 1000.0 were < 48 hour old Fathead Minnows, *Pimephales promelas*, which were purchased from Aquatox; a copy of the organism history is provided in Appendix E.

The organisms used in Test 1002.0 were < 24 hour old *Ceriodaphnia dubia* neonates, (all born within the same eight hours), obtained from an in-house culture. An organism history is provided in Appendix E.

Quality Assurance

Test Acceptability

TEST ACCEPTANCE CRITERIA for *Ceriodaphnia dubia*

| Control Criteria | Results | Pass | Fail |
|--|---------|------|------|
| Greater than or equal to 80% survival | 100% | X | |
| Average of 15 or more young per surviving female | 26.8 | X | |
| At least 60% of surviving females should have produced 3 broods | 100% | X | |
| The percent coefficient of variation between replicates must be 40% or less for the young of surviving females | 14.6% | X | |

TEST ACCEPTANCE CRITERIA for *Pimephales promelas*

| Control Criteria | Results | Pass | Fail |
|--|---------|------|------|
| Greater than or equal to 80% survival | 98% | X | |
| The percent coefficient of variation between replicates must be 40% or less for survival | 4.56% | X | |
| Minimum of 0.25 mg average dry weight of surviving controls | 0.513 | X | |
| The percent coefficient of variation between replicates must be 40% or less for growth | 16.3% | X | |

Reference Toxicant

The reference toxicant used was Potassium Chloride prepared in-house. The tests were performed using moderately hard synthetic as dilution water. The results of the reference toxicant were:

REFERENCE TOXICANT

| <i>Ceriodaphnia dubia</i> | | <i>Pimephales promelas</i> | |
|---------------------------|-------------|----------------------------|--------------|
| NOEC Survival: | 250 ppm KCl | NOEC Survival: | 500 ppm KCl |
| LOEC Survival: | 500 ppm KCl | LOEC Survival: | 1000 ppm KCl |
| NOEC Reproduction: | 250 ppm KCl | NOEC Growth: | 500 ppm KCl |
| LOEC Reproduction: | 500 ppm KCl | LOEC Growth: | 1000 ppm KCl |

Quality Assurance charts are provided in Appendix F.

Summary of Results Magcobar Mine Site

| <i>Ceriodaphnia dubia</i> | | <i>Pimephales promelas</i> | |
|---|-----------|---|-----------|
| NOEC / LOEC Survival | 100% / NA | NOEC / LOEC survival | 100% / NA |
| NOEC / LOEC Reproduction | 100% / NA | NOEC / LOEC growth | 100% / NA |
| Mean number of neonates (critical dilution) | 28.8 | %CV survival (critical dilution) | 5.71% |
| %CV Reproduction (critical dilution) | 29.0% | Mean dry weight (critical dilution) in milligrams | 0.609 |
| | | %CV growth (critical dilution) | 2.99% |

Conclusion

Chronic static renewal larval survival and growth test using fathead minnow, *Pimephales promelas*, (Method 1000.0).

The permit issued to the Magcobar Mine Site, AR0049794, specifies that the **critical dilution is 100% effluent**. The effluent samples did not exhibit lethal effects or sublethal effects at the critical dilution, and, as such, **passed** both portions of the test.

Chronic static renewal survival and reproduction test using *Ceriodaphnia dubia*, (Method 1002.0).

The permit issued to the Magcobar, AR0049794, specifies that the **critical dilution is 100% effluent**. The effluent samples did not exhibit lethal effects or sublethal effects at the critical dilution, and, as such, **passed** both portions of the test.

AA# K307495 FATHEAD MINNOW SURVIVAL, 7-25-03
File: k307495s Transform: ARC SINE(SQUARE ROOT(Y))

Shapiro - Wilk's test for normality

D = 0.096

W = 0.752

Critical W (P = 0.05) (n = 30) = 0.927

Critical W (P = 0.01) (n = 30) = 0.900

Data FAIL normality test. Try another transformation.

Warning - The first three homogeneity tests are sensitive to non-normal data and should not be performed.

AA# K307495 FATHEAD MINNOW SURVIVAL, 7-25-03
File: k307495s Transform: ARC SINE(SQUARE ROOT(Y))

Hartley's test for homogeneity of variance

Bartlett's test for homogeneity of variance

These two tests can not be performed because at least one group has zero variance.

Data FAIL to meet homogeneity of variance assumption.
Additional transformations are useless.

Lab Certification

State of Arkansas

Department of Environmental Quality Laboratory Certification Program

Be it known that **Arkansas Analytical, Inc**
Little Rock, Arkansas
has earned certification by this Department for the period of
May 14, 2003 to October 30, 2003

Laboratory ID # 60-1754

Certificate # 03-031-1

The following parameters are certified:

| | | | | |
|--------------|------------------|---------------|------------|-------------------|
| Alkalinity | Oil & Grease | Turbidity | Lead | Tin |
| Ammonia | Orthophosphate | Aluminum | Magnesium | Titanium |
| BOD | Perchlorate | Antimony | Manganese | Vanadium |
| Bromide | pH | Arsenic | Mercury | Zinc |
| CBOD | Phenol | Barium | Molybdenum | Herbicides |
| Chloride | Sulfate | Beryllium | Nickel | Pesticides & PCBs |
| Chlorine | Sulfide | Boron | Potassium | Semi-volatiles |
| COD | Surfactants | Cadmium | Selenium | TPHC |
| Conductivity | TDS | Calcium | Silver | Volatile Organics |
| Cyanide | TKN | Chromium | Sodium | Fecal Coliform |
| Fluoride | TOC | Cobalt | Strontium | Acute Toxicity |
| Hardness | Total Phosphorus | Copper | Thallium | Chronic Toxicity |
| Nitrate | Total Solids | Hex. Chromium | | |
| Nitrite | TSS | Iron | | |
