Subject: Comment for the Harrison meeting regarding proposed 3rd party rule making

I just feel that this proposed 3rd party rule making is just another example of Obama's end run around our laws, and in many cases our common sense. Before the "Gitmo prisoners" are released here, perhaps we should let the research and study of the Big Creek Research Team run its course. This may be harmful to the left wing agenda, but may just in this one case at least, show that common sense can still trump agendas.
