**Subject:** CAFO in Buffalo River National watershed

Dear Sir or Madam,

I support the proposed regulations that would not allow new permits for certain swine operations within the Buffalo National River watershed. It is appalling that the current operation was permitted in the first place.

The BNR is a pristine ecosystem that I have visited many times, as a Boy Scout, and more recently as an adult with my children. Fortunately, many Arkansans and the federal government saw fit to set aside the BNR for the enjoyment - in its present state - for future generations. I would hate to see this resource squandered for the guise of "economic development" and lose the ability to share this beautiful area more people.

It would be unforgivable if actions by our Arkansas state government allowed the degradation of the BNR and it's watershed. Please protect it!
