Subject: Ban CAFO

ADEQ,

Concerning the proposed law to ban any future medium and large hog CAFOs in the Buffalo River Watershed, I want to state I support this law. It is not an emotional response to these CAFOs. It is in response to all the scientific statistics proving how fragile this watershed area in Arkansas is. And, the dye testing has proven how quickly liquids will move into the water causing pollution of the Big Creek and ultimately the Buffalo National River.

--

Thank you so much.
