Subject: Protect our Buffalo National River Comment fro private, Arkansas Citizen

Please consider these comments at your June Meeting on this subject.

I support the strongest possible protections for this Nationally Significant resource. A CAFO cannot be made to be compatible with this objective. Whether it be water quality, acceptable visitor experience, or the vulnerable Karst geology, the two activities cannot co-exist. As a (former) professional Geologist, a Natural Resource Manager, and user of the Park, I know that a commercial hog farm will irreparably harm this park, and adversely impact the State economy in the long run.
