Subject: Closing of Hog Farm Disapproval

Dear Sir; We want to give you our opinion on the fact that the environmentalist are desiring to close all livestock operations in America. We cannot understand how they expect to continue to get food after we are gone.

We very much disapprove the actions they are taking to close down C&H Hog farm in Newton county. Every livestock operation is in some watershed as it has been for the last one hundred years and beyond. Please notice we are still surviving and are healthy, while feeding America. Land owners has the God given right to use the land as they need to, to pay their note payments and survive.

As for the Buffalo, the requirements the hog farm is required to operate under, will not do any damage to the Buffalo. However the thousands of visitors using it for their playground and using it for their BATHROOMS, has and is contaminating it pitifully right now. Hopefully you will make a personal visit and observe for yourself, you will be in for an awakening experience

Our family has farmed and ranched over sixty years. We have cared for livestock of all kinds, provided habitat for all kinds of wildlife while making our living, helping to feed the urban population and taking good care of our environment.

Thank you for your time. This is very serious. Should you allow them to close this operation down then, tomorrow they will be looking for the next operation to close.

Very Truly Yours,

Don R. Johnson
