Arkansas Pollution Control and Ecology Commission  
101 E. Capitol Ave., Suite 205  
Little Rock, AR 72201

To whom it may concern,

As a group that embraces science at the core of its everyday function – to protect the water-quality and environmental resources of the state of Arkansas – it is amazing to me that the commissioners of the PC&E are allowing a third-party rule-making proposal that is devoid of science to be considered for approval.

How can you turn your back on science at the time it is most needed?

It sounds to me like the commissioners of the PC&E have embraced the language of fear and emotion that the aginners have so loudly trumpeted.

What should ring true during this emotional debate is sound science.

Sincerely,

Harold Hendrix
