Subject: Buffalo River protections needed

Hello,

I am writing to express my support for measures to protect the Buffalo River watershed, and other watersheds in the state of Arkansas, from damage due to hog waste and run off associated with large scale hog farms. I support the proposed changes to Regulation 5 APC&E, Commission Docket #14-002-R and the proposed changes to Regulation 6 APC&E, Commission Docket #14-003-R.

There must be strict limits placed on the number of hogs allowed to be raised in any area or we will irreparably damage our waterways, and the quality of our lives. Please don't let these hog farms proliferate in Arkansas!
