Subject: Permitting process.

While others will speak to the known links to the potential economic, ecological, and public health threats that operating a CAFO like C&H Hog farms bring to such a sensitive area as the BNR, I question the loss of protection garnered in the formation of the FEDERAL designation when the transition to the new ADEQ occurred. I believe this covenant was sold for political gain, and I call for answers as to who benefited from this apart from the obvious.

sincerely,

Jeff Benefield
