Date - 6-25-14

To whom it may concern,

I Michael McElland am against any changes
To Reg - 5 and 6 - dealing with permits
for further livestock farms.

Living in Newton County and seeing what farmers
have to do that gives them the right to farm
is getting to be almost a crime against human
nature. When a farmer abides by the governing laws
that give him or her the permit to have a working
farm by ADEQ. Don't you think it strange that
given that permit by Ark Pollution Control and Ecology Commission
on a honest research program that you all have,
which most people trust, that you do your job well. I do!

Now here you are being questioned about your
integrity and service to your profession. I believe

this is a stick in your eye that a group of people
now want to control your honesty and professional
capabilities that you have spent years in
creating. So when you sit back and look at the
big picture, this restructure of the Regs is
really about making ADEQ look bad.

STOP AND SMELL THE ROSES these new Regs
are not in your favor. I makes your
organization seem and look weak.

Don't let A small Group of People.

govern what should be your choice
on how to issue permits. Don't let them
push you around and make it unfair to
new business to gain footing in new
product.

Rewrite the Regs to give the farmer
a better chance on getting started
And think about your own Job Security
for your future.

These people will eliminate your Job
if they can. Don't let them fool you
to think that they will stop here.

There is a hidden Idea in their minds
about animal^{ks} food and its governing -

Protect the rights that you and I have
as private land owners
And not be curbed by what might happen
in the minds of people who can't see that
there is a world drought in food Production.

They need to tour some of our poor
third world countrys and see the starving
children.

Don't let them add America to that list

Thank you.

Michael McCelland
