Subject: CAFO Permits in the Buffalo River Watershed

To: Arkansas Department of Environmental Quality

From: Steven Singleton, Fayetteville, AR

Subject: CAFO Permits

Please support the proposed change in ADEQ regulations that would deny permits for any new medium/large CAFO's in the Buffalo River watershed. Better to close the barn door after one horse is out than let all of them wander over the countryside.

One is bad enough, but at least the close scrutiny being given to water quality will allow monitoring of the actual effects of manure disposal on tributaries and the Buffalo itself.
