Mr. Doug Szenher

Arkansas Department of Environmental Quality

Subject:

APC&E Commission Docket #14-002-R, Support of Proposed Changes to Reg 5 & Reg 6

Dear Mr. Szenher,

At the public meeting in Harrison AR on June 17th.I stood and voiced my stand being in support of the proposed changes to Reg. 5 &

Reg. 6. I am confirming in writing that position: I continue to be in favor of the proposed changes to Regulations 5 & 6.

Due to the nature of the karst geology in the Buffalo National River watershed, it is inadvisable to permit any additional medium to large CAFO's in this region.

Respectfully,

Wendel Norton
Mount Judea, AR
