| Your connection to Arkansas waters | I live in Carroll County. This is a County with lots of chicken houses and cattle. It is a nutrient rich area. The Kings River is an extraordinary resource waterway. I do not feel like the proposed changes to regulations will continue to protect the Kings River, where I swim and kayak regularly. I also have a private well that I do not want endangered by a regulation program that is not better defined. Our state is so diverse in land use and in water quality. The need to protect our waterways is extremely important. This change will not do that. |
| Are you a private landowner that could qualify for non-point source nutrient reduction credits? | No |
| Do you trust in ADEQ's ability to critically review applications for credit-generating projects to determine if proposed offsets will result in significant adverse effects to water quality? | No. All details outlining how credits will be calculated, administered, monitored, enforced, and how credit ratios will be determined should be open for full public participation. |
| Do you believe adequate consideration should be given to the impact on ADEQ and ANRC resources and staff, and how these costs will be covered, BEFORE approving a nutrient trading regulation? | Yes |
| Without objective criteria, do you believe ADEQ or ANRC will develop sufficient monitoring protocols to determine whether projects are resulting in an "unacceptable localized adverse effect on water quality?" | No |

**Comments on
Regulation 37**

I OPPOSE Regulation 37 as written.
