Full Name	Lynn Katherine Risser
Mailing Address	432 N Assembly Dr
Your connection to Arkansas waters	We float so many rivers--the Buffalo, the Mulberry, the Cossatot, even the magnificent and perhaps most polluted southern Ouachita down by El Dorado. We are tired os seeing algae in the water, smelling chemicals in the air.
Are you a private landowner that could qualify for non-point source nutrient reduction credits?	Yes
Do you trust in ADEQ's ability to critically review applications for credit-generating projects to determine if proposed offsets will result in significant adverse effects to water quality?	No. All details outlining how credits will be calculated, administered, monitored, enforced, and how credit ratios will be determined should be open for full public participation.
Do you believe adequate consideration should be given to the impact on ADEQ and ANRC resources and staff, and how these costs will be covered, BEFORE approving a nutrient trading regulation?	Yes
Without objective criteria, do you believe ADEQ or ANRC will develop sufficient monitoring protocols to determine whether projects are resulting in an "unacceptable localized adverse effect on water quality?"	No
Comments on Regulation 37	I OPPOSE Regulation 37 as written.
Additional comments	We will not ruin Arkansas for international profit and greed.
