Subject: water quality on the Buffalo River

To Whom it May Concern:

I would like to encourage you to enforce Act 335 of 2015 and be proactive in keeping the Buffalo clean. I ride horses, kayak, or hike in and around the Buffalo a couple of days every week, and I have noticed already this year there is more algae gathering. (I have not been in the lower area to report though.) It doesn't seem right that we have laws to protect this unbelievable asset, and yet we are in court and writing letters for something that should be a given.

Please initiate rulemaking to adopt NANTRAG's draft trading regulation--be proactive in the continual fight to save the Buffalo River!

Sincerely,

Nancy Deisch
