<b>Your connection to Arkansas waters</b>	I have fished all over the state all my life. The water quality in the Buffalo River, Kings River and Beaver Lake has been at its worst ever. In areas I could barely see the bottom of the river. I get my water from White River Rural Water the taste can become quite distasteful
<b>Are you a private landowner that could qualify for non-point source nutrient reduction credits?</b>	Yes
<b>Do you trust in ADEQ's ability to critically review applications for credit-generating projects to determine if proposed offsets will result in significant adverse effects to water quality?</b>	No. All details outlining how credits will be calculated, administered, monitored, enforced, and how credit ratios will be determined should be open for full public participation.
<b>Do you believe adequate consideration should be given to the impact on ADEQ and ANRC resources and staff, and how these costs will be covered, BEFORE approving a nutrient trading regulation?</b>	No
<b>Without objective criteria, do you believe ADEQ or ANRC will develop sufficient monitoring protocols to determine whether projects are resulting in an "unacceptable localized adverse effect on water quality?"</b>	No
<b>Comments on Regulation 37</b>	I OPPOSE Regulation 37 as written.

**Concerns**

I'm concerned there is NO oversight to what ADEQ does. They turn a blind eye to pollution to our water resources through the production of massive amount of animals. Chickens waste in the the White River, hog waste in the Buffalo River.
