

June 20, 2014

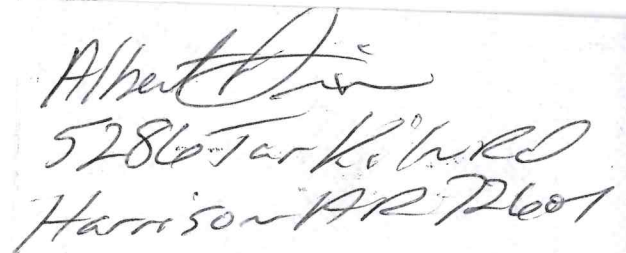

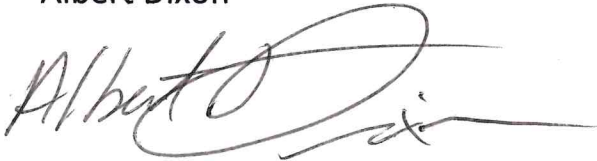

To: Arkansas Department of Environmental Quality

I wish to go on record as being against the proposed changes to Regulations 5 and 6 for the following reasons:

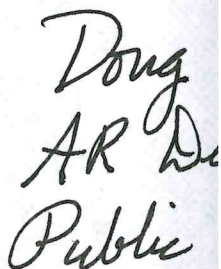

1. The proposed regulations are based upon "precautions" which have not been proven to be fact.
2. No impact on the environment, including the groundwater, has been proven.
3. Hog farms should not be penalized when no harm is done.

Thank you for allowing me to have input.
