**Subject:** Supporting third-party rulemaking petition by Ozark Society and Ark. Public Policy Panel

Please do not allow new confined animal operations and CAFOs in the Buffalo National River watershed. Look at the degradation of watersheds in Iowa and North Carolina for examples of what could easily happen here. The karst geology of that area of the Ozarks is especially unsuited to such factory farming. Please do not risk a healthy tourist industry that employs hundreds of Arkansans for an industry that employs few and is unhealthy to the environment and the people who live and visit the area.

Thank you.
