**Subject:** Buffalo River watershed

I am a concerned citizen of NW Arkansas who loves our natural resources which abound in this state. Clean water and air is essential to our survival. Protecting our national river from certain pollution is of key importance. Factory farms and nature are at odds with each other in every way. The Buffalo River has already proven to be a draw for people from all over the country. The tourist industry will employ and benefit far more people than a hog farm.

What ever benefits might accrue from the hog farm industry will be out weighed by environmental destruction of the area. There is simply no worse place on earth for a CAFO. Please relocate the factory farm to some less geologically sensitive area, far from rivers, schools, towns and any chance of water table contamination. Where would that be? Not the Buffalo River area, that's for sure.

Sincerely,

Joyce Murray
