Subject: proposed amendments to Reg 5 and 6

July 1, 2014

Mr. Doug Szenher of Arkansas Department of Environmental Quality

While it is possible to place Concentrated Animal Feeding Lots in several locations there is obviously only one site location for Buffalo River. The geology of the Buffalo River watershed has produced an irreplaceable national treasure but is completely unsuited for protecting the Buffalo River water quality from such animal operations. It is for these reasons I writing to express my support for the proposed amendments to the Arkansas Pollution Control and Ecology Commission Regulation 5 and 6, to ban any new medium and large confined and concentrated swine operations in the Buffalo National River Watershed.

Sincerely,

Kate Althoff
