To: Arkansas Pollution Control and Ecology Commission

Arkansas Department of Environmental Quality

As to the possible changes in Regulation 5 and Regulation 6, I would like to make a few points. I am a Newton County landowner who recognizes the beauty of our land. It needs to be kept in pristine condition for generations to come. However, I do not see where the possible changes could do anything but harm.

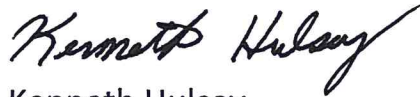

No scientific studies have proven that any changes need to be made. Regulations that exclude a single entity are arbitrary and possibly precedent setting.

The Buffalo River Watershed is adequately protected with the current laws and more are restrictive with their blanket prohibitions.

---

For the record, I am against Regulation 5 and Regulation 6.

Thank you,

Kenneth Hulsey
