Subject: No More CAFOs

I am astonished at how our governmental agencies did not investigate the damages Cargill's CAFO could do and does to our beautiful Buffalo.

You all did not do your research or even do your job!

Please, do not destroy our tourism industry. We love the Buffalo and do not intend to canoe in fecal waste!

Thank you for your comments. The Arkansas Pollution Control and Ecology Commission currently has an open public comment period until July 1, 2014, for proposed changes to Commission Regulations 5 and 6 which involve the CAFO issue. However, your E-mail does not specifically state that you intended your comments to apply to either regulation's current rulemaking initiative. In order to include your comments in the official record for one or both of the proposed regulation changes, I will need to ask you for clarification as to whether you intended your remarks in response to the current rulemaking initiatives involving Regulations 5 and/or 6.

Subject: Chang of rules

I know I did not respond specifically to the rule changes.

However, what I said applies to your entire work; a sad comment on our state's protecting of the Buffalo and surrounding areas.

Use this as you wish.

Thank you.
