Subject: PC&EC Rule 2 - Request for Expedited Review (by 11/21/24)

Good afternoon,

E&E seeks expedited review and approval of its proposed changes to PC&EC Rule 2: Water Quality Standards. We will need approval by November 21, 2024.

This rule requires expedited review because it was necessary to do a rulemaking concurrent with the codification process in order to maintain compliance with certain requirements from the EPA.

I am available should you have any questions or concerns.

Kesia Morrison
Chief Counsel
Department of Energy and Environment
