RECEIVED

JAN 21 2020

Bjnm 11:35 am

FROM: Arkansas Farm Bureau Federation
John Bailey, P.E.
Director, Environmental & Regulatory Affairs
P.O. Box 31
Little Rock, AR 72203

RE: Comments on Proposed Changes to Regulations 5 & 6

To whom it may concern:

The Arkansas Farm Bureau Federation would like to offer the following comments opposing the permanent moratorium on the Buffalo River watershed as initiated in Arkansas Pollution Control & Ecology Commission (APC&EC) Regulation's 5 and 6. Our organization is a non-profit agriculture advocacy association with more than 190,000 members of whom 50,000 are directly engaged in agriculture production. Despite the fact there is no scientific evidence showing that animal agriculture is causing an environmental impact, the Arkansas Division of Environmental Quality (ADEQ) continues to initiate rulemaking implementing a permanent moratorium in the Buffalo River watershed.

Farm Bureau's focus is to ensure that sound science drives the production and practices of our farmers and ranchers and to ensure that regulatory requirements being applied to farmers and ranchers by state and federal agencies employ the same science. That is why we are concerned the ADEQ and APC&EC initiated rulemaking to prohibit landowners within the Buffalo River watershed their right to farm without a single shred of scientific evidence that animal agriculture, and in this case C&H Hog Farms, had caused an environmental impact. Instead ADEQ has allowed emotion to dictate regulation when it should be using sound science. Because the ADEQ and APC&EC do not provide scientific justification for the moratorium and is potentially in violation of state right to farm laws, Farm Bureau questions if the Commission is the proper venue to establish such a rule. Rather, should this rule making not be referred to the legislature? Where our elected officials who are charged with creating such laws would be potentially held accountable.

C&H Hog Farms was, and still to this day, the most heavily scrutinized and monitored farm in the state. The Big Creek Research and Extension Team was originally created by then Governor Mike Beebe to evaluate the potential impact and sustainable management of the C&H Farms operation on the water quality of Big Creek. Several years later, the ADEQ funded a drilling study to evaluate the lithology/geology below the waste storage ponds at C&H Hog Farms and to assess potential subsurface impact from the waste storage ponds. Upon completion of the drilling study, Governor Asa Hutchinson created the Beautiful Buffalo River Action Committee and authorized the development of a Watershed Management Plan for the Buffalo River Watershed that would evaluate its tributaries to determine which streams would need the most attention. The United States Geologic Survey (USGS) studied algal growth on the Buffalo River, as well as, nutrient concentrations upstream and downstream of Big Creek on the

Buffalo River. All of these studies identified above determined Big Creek continues to maintain pristine water quality and C&H was having no environmental impact.

In addition to the studies mentioned above, on April 23rd of last year the National Park Service held its first Buffalo National River Science Symposium. During the symposium scientist and attendees were asked to check their biases at the door and to let the science speak for itself. Numerous studies were presented by various third-party groups. All concluded that based on the data collected there were environmental issues in the Buffalo River; however, none could be attributed to the C&H Hog Farms operation. Despite conclusions of these state and federally funded independent third-party studies mentioned above and data presented at the National Park Science Symposium showing C&H Hog Farms was having no environmental impact, both ADEQ and APC&EC have chosen to initiate rulemaking by the precautionary principle rather than sound science.

Environmental groups state the moratorium is based on sound science and the justification used is to merely regurgitate the definition of karst. The mere presence of karst does not constitute scientific justification for a permanent moratorium. As a matter of fact, guidance documents and agricultural handbooks produced by the USDA and USGS do not prohibit locating animal agriculture in Karst but merely suggest additional management practices. Measured empirical data clearly shows that a properly operated animal operation within the watershed will not have an environmental impact. What gets lost in this conversation is that all of Northwest and Northcentral Arkansas from the Oklahoma Border to the Black River and North of the Arkansas River to Missouri as well as portion of Southwest Arkansas are underlain by karst. Using this same flawed logic, these areas should also be included in the moratorium.

Lest we forget, the temporary moratorium was put in place until such time as the Big Creek and Research & Extension Team (BCRET) could study the impacts of the C&H Hog Farms operation. When the report was released in October of last year, including the revised final report released in December of last year, it showed that C&H Hog Farms was not having an environmental impact. As stated in the opening remarks, the ADEQ continues to ignore independent third-party scientific reports that were paid for using taxpayer money to evaluate the impacts of C&H Hog Farms on Big Creek, that repeatedly stated C&H Hog Farms did not impact Big Creek or the Buffalo River. By finalizing the moratorium ADEQ and the APC&EC will prevent landowners within the watershed from exercising their right to farm and therefore violates Ark. Code Ann. § 2-4-101 et. al.

LET SOUND SCIENCE RULE

Regulations from the Arkansas Department of Environmental Quality should be based on sound science, not emotion. The state-funded research from the Big Creek Research & Extension team shows no need for a permanent moratorium.

Moratoriums, when not based on sound science, should be enacted by the legislature.

Therefore, I oppose the permanent moratorium within the Buffalo River Watershed and request the proposed changes to Arkansas Pollution Control and Ecology Regulations 5 & 6 be denied.

LET SOUND SCIENCE RULE

Regulations from the Arkansas Department of Environmental Quality should be based on sound science, not emotion. The state-funded research from the Big Creek Research & Extension team shows no need for a permanent moratorium.

Moratoriums, when not based on sound science, should be enacted by the legislature.

Therefore, I oppose the permanent moratorium within the Buffalo River Watershed and request the proposed changes to Arkansas Pollution Control and Ecology Regulations 5 & 6 be denied.

LET SOUND SCIENCE RULE

Regulations from the Arkansas Department of Environmental Quality should be based on sound science, not emotion. The state-funded research from the Big Creek Research & Extension team shows no need for a permanent moratorium.

Moratoriums, when not based on sound science, should be enacted by the legislature.

Therefore, I oppose the permanent moratorium within the Buffalo River Watershed and request the proposed changes to Arkansas Pollution Control and Ecology Regulations 5 & 6 be denied.

North Little Rock, AR 72118

LET SOUND SCIENCE RULE

Regulations from the Arkansas Department of Environmental Quality should be based on sound science, not emotion. The state-funded research from the Big Creek Research & Extension team shows no need for a permanent moratorium.

Moratoriums, when not based on sound science, should be enacted by the legislature.

Therefore, I oppose the permanent moratorium within the Buffalo River Watershed and request the proposed changes to Arkansas Pollution Control and Ecology Regulations 5 & 6 be denied.

Name: Deborah Brennan

Address: 8035 Hwy 336 W

City: Clinton State: AR zip: 72031

Additional Comments

No permanent
moratoriums without

sound science by APEQ

OR Legislature

No Non Science Based Decisions
that negatively impact
Agriculture.

Name: Robert Stobaugh

Address: 13 Bruce Circle

City: Atkins State: AR Zip: 72823

Additional Comments

We should never allow any regulations to be put in place if the cause is not based in research. Outside groups with their own agenda should never effect regulation!

We all want of natural resources to be protected not used by anti farm/animal groups to collect more money.

LET SOUND SCIENCE RULE

Regulations from the Arkansas Department of Environmental Quality should be based on sound science, not emotion. The state-funded research from the Big Creek Research & Extension team shows no need for a permanent moratorium.

Moratoriums, when not based on sound science, should be enacted by the legislature.

Therefore, I oppose the permanent moratorium within the Buffalo River Watershed and request the proposed changes to Arkansas Pollution Control and Ecology Regulations 5 & 6 be denied.

Additional Comments

I have looked at the
Big Creek Farm for several
years. Based on the
scientific evidence ~~we~~
don't see where the farm
polluted the Buffalo.
It was just an
emotional issue.
