---

I agree with and support rules #5 and #6 concerning hog farming on or close to the Buffalo River. The White River watershed is a special area and we don't want to destroy what we have today. That's for any river or watershed in the State of Arkansas. I can't believe the State of Arkansas allowed hog farming to begin with. We need to be smarter than that. We need to protect our waterways because once they're gone there is no bringing them back.
