Subject: Buffalo moratorium
Date: Sunday, September 15, 2019 2:43:49 PM

I support the changes proposed by ADEQ to Rule 5 and Rule 6 that would institute a permanent moratorium on issuance of permits for medium and large swine CAFOs in the Buffalo National River watershed.

The karst rock in this area causes waste products to be able to make their way through into the watershed. It's obvious that all of the fertilizer animal waste and poor management are making all of our rivers and streams unsafe. Look at all of the deaths of animals caused by blue green algae, which is a direct result of runoff caused by chemicals and waste and not enough vegetation to filter it before it reaches the streams.

Your children and their children are going to have to try and fix this to be able to sustain food and drinking water.

Thanks Linda
