Subject: Support Moratorium
Date: Tuesday, August 27, 2019 5:35:15 PM

It is very important that Arkansas protect the Buffalo National River as well as other waterways. Contained Animal Farming Operations CAFOs place waterways at risk especially in areas of karst topography as we have in the Ozarks. There are many other farming operations that have less risk of water pollution. Please support a permanent moratorium on CAFOs in the Buffalo River watershed.

It is the responsibility of ADEQ to protect our environment from pollution. A permanent moratorium on CAFO's in the BNR area is an appropriate step to protect the environment.

Thank you. Lowell Collins
