Subject: Buffalo River watershed moratorium
Date: Saturday, September 14, 2019 9:19:19 PM

To our Arkansas Legislators,

Protecting the beautiful Buffalo River Valley from contaminants that result from industrial farming operations is imperative to the survival of the river and the people who reside here. Some of the people that live here get their water directly out of the river - they're not on city water. What would they do? What would happen to the farmers if their land was poisoned by river full of feces and nitrates?? Please, continue to stand up to farms like C&H and make the block against them permanent and widespread. I know you love Arkansas just like I do. Please protect this gorgeous place.
