Subject: Buffalo moratorium
Date: Sunday, September 15, 2019 1:49:32 PM

Please close and clean up the C&H Hog Farm before it does any more damage than it has done already.

I live on the Little Buffalo, which is directly downstream from a waste spreading site. I do not want my beautiful river full of bacteria and algae.

I support the changes proposed by ADEQ to Rule 5 and Rule 6 that would institute a permanent moratorium on issuance of permits for medium and large swine CAFOs in the Buffalo National River watershed.

- The karst geology in the Buffalo river area makes it unsuitable for concentrated animal feeding operations due to the many caves, springs and underground streams.
- Soils in the Buffalo watershed are thin and are thus unable to contain the large amounts of animal waste that are produced by CAFOs.
- Permitting C&H was an admitted mistake. Only a ban on this type of facility can ensure that the mistake is not repeated in the future.

Sincerely,
Nancy & Harrison Miner
