Board of ADEQ:

It is imperative that we protect our air, water and soil. Industry cannot ride roughshod over the needs of future generations to have a chance at good health and clean, safe outdoor recreational activities.

We cannot allow medium and large hog farm factories to exist here. That's right. Exist. (They should not exist anywhere.)

They are an abomination of greed, despoiling our "Natural State".

According to Wikipedia: The **Arkansas** Department of Environmental Quality is a department of the government of **Arkansas** under the Governor of **Arkansas**. It is responsible for protecting human health and for safeguarding the natural environment: air, water, and land.

Grow some balls and make a decision for what you know to be right for your children and grandchildren.

Thank you in advance,  
Quinn Montana  
Fayetteville, AR
