Protect our National River. Keep the watershed safe from waste spread on the area “forevermore.”

Keep us from being a national pariah because (some poster said) “Calling the Hogs” means Arkansas’s citizens have okay’d spreading hog poop over their land and letting it pollute state and national waters. Let’s honor our football team, and our waters, most especially our Buffalo National River, by passing laws to clearly state we keep manure from hogs (and other confined edible creatures) away from sensitive areas—WAY away! .

Thank you, Radine
