I am Sharon Gattis and I am sending this email to let you know that me and my family are in favor of a permanent moratorium that would stop destruction and pollution on our precious Buffalo National River. This river is too important to our state and does not need any one or any thing to be allowed to pollute or destroy it in any matter. My family appreciates the leadership of Governor Hutchinson and your Commission that they took to make the necessary steps to protect this most significant tourist attraction that we have in Arkansas. Please continue to protect the Buffalo River and over waterways in our great state of Arkansas.

Respectfully submitted,

Sharon Gattis
