Subject: Regulation 6 in Docket 13-007-R

Please take a note from my grandchild's fifth grade Scott Foresman (Arkansas edition) science textbook:
"Fresh water is not evenly spread over the world. Some places have much more fresh water than others.
But no matter where you are, there is only a limited amount of fresh water. Water should be used
wisely."

Really, it couldn't be put more plainly than that. This degradation of water quality standards
statewide and the likely violation of the Federal Clean Water Act clearly flies in the face of
elementary science. Next to our precious grandchildren, water has been, is, and will be Arkansas's
most valuable resource.

Put me down as opposed to **Regulation 6 in Docket 13-007-R related to ACt 954.**
