Subject: Opposed to changes in Reg. 6 contained in Docket 13-007-R

Importance: High

I am contacting you to please oppose the changes to Reg 6 contained in Docket 13-007-R.

Docket 13-007-R includes a change to Regulation 6 proposed by ADEQ which implements changes from Act 954, permitting industries and municipalities to increase pollutant levels for any body of water not currently designated as a drinking source. The bottom line is that it's a degradation of water quality standards statewide and the Environmental Protection Agency has stated that making these changes would result in a violation of the Federal Clean Water Act.
