Subject: notification Process REG 6

Dera Mr Szenher,

I attended the meeting this past Monday, July 14th, at the ADEQ headquarters and commented orally on the proposed changes to the notification process. Here is my written statement for the record:

I am in favor of ADEQ's proposed changes to the notification process regarding Reg 6 with the addition of the following points:

Notification should be placed in local and regional newspapers due to the fact that many residents of rural areas do not have computer/internet access. The language under 6.207(A) specifying that "written and published notification would be issued no more than 30 days prior to submission of the NOI". That the Arkansas Dept. of Health be included in the list of entities to be notified. Where a facility that is to be located in the watershed of a National Park, the National Park Service be notified.

Sincerely,

Laura Timby
