Subject: Reg 6 Comments

Dear Mr. Osborn,

I apologize I cannot attend the public hearing on Regulation 6 due to work conflicts. Please accept the following comment into public record.

Regarding the agencies proposed changes to Regulation 6 related to Act 575 of 2015, I appreciate the efforts to improve the financial assurance requirements for non-municipal sewage treatment works. The implementation of this trust fund is a good first step. I believe that there is additional work to be done to increase assurances to the people of Arkansas that non-municipal sewage treatment works are financially stable and have a plan for making inevitable upgrades and repairs to keep their facilities in good working order and to continue protecting our state's waterways. I look forward to working with the agency to continue making those improvements.

Andy Davis
State Representative
